INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve investment returns that closely track the total return of the iBoxx ABF Philippines index, before fees and expenses, by investing in a diversified portfolio of peso-denominated sovereign, quasi-sovereign, and supranational bonds.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The ABF Philippines Bond Index Fund is for investors who:

- Are at least classified as moderately aggressive based on their risk profile.
- Have an investment horizon of at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The fund invests in domestic government- issued/ guaranteed securities comprising the iBoxx ABF Philippines Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, and/ or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.
Down-grade Risk:	Investors are exposed to the risk of loss arising from adverse changes in the prices of domestic government-issued/ guaranteed securities due to a downgrade in the credit rating of the Philippines.
Index Tracking Risk:	Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.21% in January, with benchmark government yields rising 1 basis point (bp) on average. The yield curve pivoted steeper, with benchmark yields on the short end of the curve declining as longer-term benchmark yields rose. Average daily trading volume rose to PHP39.2bn, from December's PHP26.4bn, with the 4.6-year RTB5-13 and 4.7-year FXTN10-60 securities seeing the highest trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions in January, with PHP30bn on offer for each. The first was a reissuance of the 4.7-year security FXTN10-60 (first issued in September 2015); the second was a reissuance of the 6.3-year security FXTN10-61 (first issued in May 2017). Both reissuances saw strong demand and were fully awarded; FXTN10-60 saw total bids of PHP98.7bn and was awarded at an average yield of 2.536%, 36 bps lower than the average yield at which it was awarded in its previous reissuance in November 2020. Meanwhile, FXTN10-61 saw bids totaling PHP82.6bn, and was awarded at an average yield of 2.719%, 7 bps lower than its average yield when it was last reissued in December 2020.

In the local economic space, December inflation came in at 3.5% year-on-year, above expectations of 3.2% and bringing full-year 2020 average inflation to 2.6%. Food inflation continued to spike, driven by supply constraints due to the effects of inclement weather and the African Swine Flu. The Philippine full-year GDP figure also disappointed, with fourth-quarter year-on-year growth at -8.3%, bringing the full-year 2020 growth figure to an all-time low of -9.5%. Weak demand and capital formation were the main causes of the decline, as pandemic-related mobility constraints impeded spending and lowered demand expectations, causing companies to cut capital expenditures. The negative growth and high inflation figures, together with doubts about local vaccine acquisition and distribution capability, impaired local risk sentiment, driving investors into safer assets and pushing risk asset prices lower. With its policy rate at record lows and with the possibility of transitorily higher inflation, the Bangko Sentral ng Pilipinas (BSP) is expected to remain accommodative but maintain current policy. In statements made throughout the month, BSP Governor Benjamin Diokno continued to emphasize the bank's focus on supporting growth using the full range of policy tools at its disposal.

Fund Performance. The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.27% for the month, closely tracking the benchmark index.

Fund Strategy. The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.

LIST OF PROSPECTIVE INVESTMENTS

ABF Philippines Bond Index Fund may invest in the following:

- (a) Index securities consisting of peso-denominated debt obligations issued or guaranteed by the Philippine Government, by an agency or instrumentality of the Philippine Government, by a Philippine Government sponsored entity or quasi Philippine Government entity and peso-denominated debt obligations issued by supranational financial institution, or by an agency or instrumentality of any supranational financial institution or by an entity sponsored by any supranational financial institution, in each case as determined by the Index Licensor and which are for the time being constituent securities of the iBoxx ABF Philippines Index.
- (b) Non-index securities consisting of peso-denominated securities which are issued by an issuer of any Index Security and are similar to comparable Index Securities and are likely to behave in such a manner that is consistent with the Investment Objective.
- (c) Bank deposits and such other investments allowed under regulations issued by the BSP.
