**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

<b>Interest Rate Risk:</b>	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
<b>Equity Price Risk:</b>	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
<b>Liquidity Risk:</b>	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
<b>Related Party Risk:</b>	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
<b>Credit/ Default Risk:</b>	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange rose for another month following a continued improvement in the overall environment in this stage of the pandemic. A confluence of catalysts, namely – continuous drop in the number of COVID-19 cases, rise in the vaccination rates, better-than-expected economic growth and looser restrictions – led to the positive market sentiment. The local bell-weather index even surged to 5.5% to the 7,400 level intra-month before the threat of a newly-detected “Omicron” variant pared some of the gains. The PSEi grew by 2.1% month-on-month to close at 7,200.88 in November.

Market activity was a tad lighter for the month with average value turnover at US\$201.87 million or lower by 0.3% month-on-month. In terms of foreign activity, foreigners were net buyers for the 2nd consecutive month with US\$5.03 million that came in. The follow-on offering of Synergy Grid or “SGP” buoyed inflows after registering US\$24.2 million. MSCI rebalancing also occurred at month-end which highlighted the inclusion of AC Energy and Monde Nissin. Overall, the MSCI led to a net US\$13 million worth of inflow. Foreign participation registered at 49%, higher than 41% in October.

In terms of individual stock performance, main advancers were: BLOOM (+14.56%), SMPH (+12.99%) and ICT (+9.94%) while the laggards are as follows: ACEN (-7.99%), AP (-6.84%) and JGS (-6.06%).

In the local economic space, October inflation further eased to 4.6% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. Meanwhile, the country’s GDP growth came in at +7.1% year-on-year, beating the consensus estimate of 4.8%. Growth was driven by the industrial service sectors, while the agricultural sector lagged due to bad weather and the African Swine Fever outbreaks. Though growth has proven robust in recent quarters, analysts believe there is room for the central bank to keep rates accommodative. Sure enough, during its Monetary Board meeting last November 18, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate at a record low, citing the need for continued monetary support for the economy. It likewise cut its projected 2022 inflation forecast to 4.3% from 4.4% originally.

**Fund Performance.** The fund returned 0.76% in November, underperforming its benchmark by 33 basis points. Year-to-date, it underperformed the benchmark by 100 basis points with a return of 0.25%.

**Fund Strategy.** We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclical. We will continue to be nimble and take advantage on tactical opportunities.

For the fixed income portion of the fund, we continue to favor the safety of time deposits and short term securities. Expectations of continued accommodative monetary policy may depress rates in the near term.
