INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a balanced UITF with 5% to 20% equities exposure that intends to achieve for its Participants long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine 1-3 Year Index and 10% PSEi net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Invest Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.09 % in August, with benchmark government yields rising 8.53 basis points (bps) on average. The yield curve steepened, with rates on the long-end of the curve rising more than those of the belly or the short-end. Average daily trading volume rose to PHP22.20bn from July's PHP20.60bn with trades mostly seen on the belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (10-, 7-, 20 and 11-year tenors) and five Treasury Bill auctions in August. Demand was quite healthy for the first two FXTNs, while reception for the third was somewhat lukewarm, and the last (11-year reissuance of FXTN20-20) fully rejected with market bids seen as too high. There was 1 newly issued paper last month, the fully awarded 7-year FXTN7-65 (coupon of 3.750% with average yield of 3.674%). Meanwhile, average yields for the reissued FXTN10-66 and FXTN25-11 (reissued as a 20-year) were awarded at 3.914% and 4.986%, respectively. The rejected FXTN20-20 auction would have averaged at 4.533%, had the issue been fully awarded. Towards month-end, the BTr released its September auction schedule, announcing five weekly FXTN issuances (5-, twice 7-, and twice 10-year tenors) and five weekly Tbill auctions.

In the local economic space, July inflation continued to ease to 4.0% year-on-year, compared to June's 4.4% and lower than the median forecast. Though it declined, the figure marks another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. The country's 2Q2021 GDP grew by 11.8% YoY, ending the recession mostly due to base effects. Growth was driven by industry and services, while the agricultural sector lagged. During its Monetary Board held August 12, the Bangko Sentral ng Pilipinas hiked its average inflation forecasts by 1% each year, to 4.1% in 2021 and 3.1% for 2022-2023. It stated however, that the rate of price increases has likely peaked as of earlier this year. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

The Philippine Stock Exchange (PSEi) rallied on the month of August, rising by 9.3% to 6,855.44. It was mainly due to renewed interest in the market after a 9.2% decline in the previous month. Gains were across the board with 26 out of the 30 index names ending in the green. During the month, the Philippine Stock Exchange conducted its semi-annual review where we saw AC Energy Corp (ACEN) and Converge ICT Solutions Inc (CNVRG) making its way in the index replacing DMCI Holdings and Emperador Inc. Moreover, the rally was led by the outperformance of the telecommunications sector particularly GLO and TEL as demand for broadband services remain robust on mobility constraints coupled with investors' excitement over the telcos' fintech units.

August saw a spike in activity with Average Daily Turnover rising by 28.20% to US\$150 million. Meanwhile, we finally saw foreigners' net position to a "buy" at US\$32 million, bucking the trend of consecutive months of net foreign selling.

In terms of individual stock performances, main advancers were: GLO (+46.24%), CNVRG (+35.96%) and AP (+20.69%); while the main laggards include: LTG (-12.49%), RRHI (-5.03%) and FGEN (-2.41%).

Fund Performance. The fund returned -1.01% in July, underperforming its benchmark by 23 bps. Year-to-date, it underperformed the benchmark by 62 basis points with a return of -0.82%.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of slightly accelerating local inflation amid recovering oil prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS
