The BPI Invest Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.49% in December, with benchmark government yields falling 2.99 basis points (bps) on average. Average daily trading volume fell to PHP14.880bn from November's PHP15.762bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) issued only two FXTNs in December, the 10- and 7-year tenors. However, following strong demand for its 5.5-year Retail Treasury Bond issuance last November, bids on both auctions were fully rejected. The BTr also released its January auction schedule, announcing four FXTN issuances (4-, 10- and two 7-year tenors) and four Tbill auctions.

In the local economic space, November inflation further eased to 4.2% year-on-year, with the rise in food prices slowing even as energy costs remained elevated. As inflation is seen to be tempered moving into next year, most analysts believe there is room for the central bank to keep rates accommodative. In early December, the Department of Health shortened the duration between the COVID-19 vaccine second dose and booster from six months to three months. This proved timely as the highly infectious COVID-19 Omicron variant continued its global spread. The BSP kept the policy rate at its record 2% low during the last meeting for 2021, but raised its inflation forecast of 4.4% and 3.4% for 2021 and 2022, citing potential supply constraints on key food items and transport hike petitions as upside risks.

The local bourse index tumbled to end 2021 following the sharp rise in the number of COVID-19 cases. A suspected new variant called "Omicron", along with the traditional holiday gatherings propelled a new surge. The alarm bells sounded-off and the government swiftly responded by enforcing a stricter quarantine measure – Alert level 3 in the National Capital Region from January 3 to 15. The PSEi declined by 1.09% month-on-month, to close 2021 at 7,122.63. For the year, the Philippines slipped by 0.24%.

In terms of market activity, the month of December gained more traction with Average Daily Turnover rising by 15.4% to US\$232.89 million. For foreign activity, foreigners continued to be net buyers with US\$1.72 Bn worth of inflows. Foreign participation was at 45%, lower than 49% recorded in November.

For this month's individual stock performance, the main advancers are as follows: MBT (+11.62%), AEV (+10.90%), and TEL (+7.86%) while the laggards were BLOOM (-19.13%), SMPH (-9.36%) and JFC (-7.90%).

Fund Performance. The fund returned 0.21% in December, outperforming its benchmark by 9 bps. Year-to-date, it outperformed the benchmark by 4 basis points with a return of 1.06%.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of slightly accelerating local inflation amid recovering oil prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS
