The Fund is a balanced UITF with 5% to 20% equities exposure that intends to achieve for its Participants long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine 1-3 Year Index and 10% PSEi net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Invest Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -2.48% in February, with benchmark government yields rising 57 basis points (bps) on average. The curvature of the yield curve increased, with benchmark yields in the belly of the curve rising with a greater magnitude than the rise in short- and long-term yields. Average daily trading volume fell to PHP23.4bn from January's PHP39.2bn, with the 4.5-year RTB5-13 and 9.4-year FXTN10-65 securities seeing the highest trading volumes over the month. The Bureau of the Treasury (BTr) held two auctions in February. The first was a PHP30-bn reissuance of the 9.4-year security FXTN10-65 (first issued in July 2020); the second was the pricing auction for the March issuance of a new 3-year Retail Treasury Bond, RTB3-11. FXTN10-65 saw total bids of PHP63.05bn and was fully awarded at an average yield of 3.066%. Meanwhile, bids for the new RTB3-11 totaled PHP284.18bn, and the BTr accepted a total of PHP221.22bn worth of bids, awarded at an average yield of 2.375%. The RTB's offer period continues until its March 9 issuance. In the local economic space, January inflation came in at 4.2% year-on-year, above expectations of 3.5% and quickening from December's 3.5% figure. Food inflation due to supply chain and logistical issues and higher transportation costs due to rising oil prices were the main drivers of the headline figure's increase. Meanwhile, President Duterte rejected calls to loosen quarantine restrictions, citing his desire for more widespread vaccination before easing restrictions. With spiking inflation and slow economic growth continuing to dampen risk sentiment, the Bangko Sentral ng Pilipinas (BSP) kept policy rates steady in its February meeting but raised its full-year 2021 inflation forecast to 4% from its previous forecast of 3.2%. In statements made throughout the month, BSP Governor Benjamin Diokno stated that the spike in inflation was transitory and was being dealt with through non-monetary measures, and suggested that policy rates would remain at current levels until at least the end of the first half of the year.

The Philippine Stock Exchange Index (PSEi) mildly rebounded for the month of February following a slow start of the year. However, much of the recovery was felt during the first week and gains were pared by the renewed concerns over the continuous rising COVID-19 cases, slow vaccination pace, and a seemingly longer economic recovery. Moreover, the surprise inflation print (which came out at 4.2% YoY in January, breaching the 2-4% target by the BSP) led to a knee jerk reaction from the market. Volume surged this month, rising by 10.4% to US\$254 million. Foreign activity, meanwhile, remained on the sell side, with net foreign outflows recorded at US\$190 million. Macro-economic news for the month include: 1) Inflation rose to 4.2% in January on the back of spikes in food prices, notably on meat, vegetables and fruits. These were partly due to the spill-over effects of typhoons and the African Swine Flu. 2) Remittances dropped in December to US\$2.89 billion owing to declines from Europe (-31%) and Asia (-9%) that offset gains from the USA (+14%). 3) Government debt-to-GDP ratio soared to 14-year high at 54% in December 2020 as the government accelerated borrowings last year due to the pandemic.

In terms of stock performance, the main advancers are as follows: MBT (+12.67%), BPI (+12.02%) and AGI (+8.48%) while the biggest decliners were RRHI (-7.52%), URC (-5.41%) and MEG (-5.24%).

Fund Performance. The fund returned -0.19% in February, behind its benchmark by 11 basis points. It is behind the benchmark since inception by 121 basis points with a return of 11.28%.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of slightly accelerating local inflation amid recovering oil prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
