## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -1.01% in October, with benchmark government yields rising 21.76 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising more than the long-end. Average daily trading volume dropped to PHP13.997bn from September's PHP18.615bn with trades mostly seen on the short-end (3 months to 1 year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (two 7-, 6-, and 5-year tenors) and four Treasury Bill auctions in October. Demand was moderate across all the auctions with bids amounting to less than double the original offered volumes, but market players were clearly seeking higher yields. Average rates on the first and second 7-year auctions were at 4.207% and 4.468% respectively, while average rates on the 5-year auction was at 3.576%. Meanwhile, the 5.5-year auction was fully rejected as investors bid for higher rates. Towards month-end, the BTr released its November auction schedule, announcing four weekly FXTN issuances (10-, 7- and two 5-year tenors) and four weekly Tbill auctions.

In the local economic space, September inflation eased to 4.8% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. The figure marks yet another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Nevertheless, the BSP continues to reiterate that prevailing monetary policy settings are still appropriate, given the current inflation environment and tempered growth outlook.

The Philippine Stock Exchange Index climbed yet again on improved market sentiment as optimism in the country's re-opening shifts to another gear. The country is experiencing continuous drop in the number of COVID-19 cases and thus translating to further easing of restrictions which helps boost the economy. The local bell-weather index rose by 1.46% to close at 7,054.70.

The market was more active in October after registering an Average Value Turnover of US\$202.53 or 15.7% higher than September. One of the main proponents of this higher activity was the deletion of First Gen Corp (FGEN) shortly after its tender offer. This was replaced by Wilcon Depot, Inc. (WLCON).

In terms of foreign activity, we saw foreigners turned net buyers this month at US\$8.02 million. This was buoyed by Megaworld REIT IPO and a block transaction of Union Bank. Otherwise, it would be another foreign selling month.

In terms of individual stock performance, main advancers were: RRHI (+20.17%), JFC (+14.73%), and BLOOM (+14.48%) while laggards were CNVRG (-20.50%), ICT (-7.69%) and JGS (-7.38%).

**Fund Performance.** The fund returned 0.05% in September, underperforming its benchmark by 7 bps. Year-to-date, it underperformed the benchmark by 28 basis points with a return of 0.74%.

**Fund Strategy.** The Fund looks to maintain a neutral duration position given expectations of slightly accelerating local inflation amid recovering oil prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
