OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) was off to a roller-coaster start, climbing high as high as 7,400 intra-day towards mid-month before plummeting at the end to close at 6,612.62 or -7.40% month on month. Early optimism over the COVID-19 vaccines that spurred the market has dissipated on expectations that the actual execution will be delayed. This entails that the economic recovery will also be pushed back. Volumes rose on a month-on-month basis, with the average daily turnover registering at US\$230 million. This is owing to the spike in local retail activity seen in small cap stocks. Foreign outflows continued, recording at US\$273 million to begin the year.

Macro-economic news for the month include: 1) 4Q2020 GDP fell by 8.3% (behind consensus of 7.9%) owing to weak domestic demand, and capital formation. 2) Inflation rose to 3.5% in December, within the BSP's 2.9% to 3.7% range. The increase was a result of higher food prices (vegetables, fruits and meats) due to supply constraints from typhoons. 3) The country's gross international reserves (GIR) climbed to US\$109.8 billion in end-December or equivalent to 11.7 months' worth of imports.

In terms of stock performance, the main advancers are as follows: FGEN (+5.86%), and LTG (+1.2%), while the biggest detractors were AEV (-15.77%), JGS (-15.08%) and PGOLD (12.20%).

Fund Performance. The fund returned -7.04% in January, outperforming its benchmark by 34 basis points.

Fund Strategy. We look to stay invested in domestic equities given the low global interest rates. We will continue buying on dips and adhere to large cap quality cyclical.
