KEY RISKS AND RISK MANAGEMENT

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.11% in April, despite short-end benchmark government yields rising 6.5 basis points (bps) on average. The yield curve flattened, with rates in the belly and long-end of the curve declining while short-term yields rose slightly. Average daily trading volume rose to PHP19.84bn from March's PHP18.66bn, with the 4.5-year RTB5-13 and the newly issued RTB3-11 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions and four Treasury Bill auctions in April. The first FXTN auction was a PHP35-bn issuance of a new 7-year security FXTN7-64; the second was another PHP35-bn issuance of a new 5-year security FXTN5-77. Average bid yields were at 3.529% and 3.301%, respectively, while coupons were at 3.625% and 3.375%, respectively. Market demand was quite strong with bids exceeding PHP80-bn for each. The BTr opened a PHP25-bn tap issuance for the FXTN7-64 which was fully awarded after bids amounted to nearly double the offered size. Meanwhile, the Treasury Bills saw yields rising gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.369%, 1.714% and 1.880%, respectively, during the last auction of the month.

In the local economic space, March inflation eased to 4.5% year-on-year, slightly lower than February's 4.7% figure and putting an end to the 5-month streak of monthly price accelerations. The slowdown was mainly attributed to food and non-alcoholic beverage prices, though the Philippine Statistics Authority noted more tempered increases across all other price categories as well. Bangko Sentral ng Pilipinas (BSP) Governor Benjamin Diokno noted that the current level of inflation was still "consistent with expectations", adding that "inflation could settle above the high end of the target in 2021, reflecting the impact of supply-side constraints". Meanwhile, local coronavirus (COVID) infections continued to surge to new highs – peaking at 10,686 new cases in a day-- which prompted President Duterte to further extend various iterations of Community Quarantine across the country. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) maintains that its current monetary policy is still appropriate. Governor Diokno reiterated that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

Fund Performance. The Fund returned 0.16% during the month, outperforming its benchmark by 9 bps. Meanwhile, the YTD the Fund returned 0.27%, outperforming the benchmark by 4 bps.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
