Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.99% in December, as benchmark short-term government yields fell 10.99 basis points (bps) on average. Average daily trading volume fell to PHP14.880bn from November's PHP15.762bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) held three Treasury Bill auctions in December. Treasury Bills saw yields inch slightly higher throughout the month, as investors looked to the potential for rising rates globally. However, preference for the shorter end of the curve prevailed as all the auctions continued to be oversubscribed. Average rates for the last auction of the 91-, 182- and 364-day papers were awarded at 1.164%, 1.449% and 1.636%, respectively, during the last auction of the month. Towards month-end, the BTr released its November auction schedule, announcing two FXTN issuances (10- and 7-year tenors) and three Tbill auctions.

In the local economic space, November inflation further eased to 4.2% year-on-year, with the rise in food prices slowing even as energy costs remained elevated. As inflation is seen to be tempered moving into next year, most analysts believe there is room for the central bank to keep rates accommodative. In early December, the Department of Health shortened the duration between the COVID19 vaccine second dose and booster from six months to three months. This proved timely as the highly infectious COVID19 Omicron variant continued its global spread. The BSP kept the policy rate at its record 2% low during the last meeting for 2021, but raised its inflation forecast of 4.4% and 3.4% for 2021 and 2022, citing potential supply constraints on key food items and transport hike petitions as upside risks.

Fund Performance. The Fund returned 0.15% during the month, outperforming the benchmark by 7 bps. Meanwhile, the YTD the Fund returned 1.15%, higher than the benchmark by 20 bps.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
