## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned 0.15% in May, as short-end benchmark government yields fell 7.3 basis points (bps) on average. The yield curve steepened somewhat, with rates on the short-end of the curve declining while yields on the belly and long-end of the curve rose. Average daily trading volume rose to PHP21.01bn from April's PHP19.84bn, with the 4.5-year RTB5-13 and the newly issued FXTN5-77 and FXTN7-64 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in April. Treasury Bills saw yields falling gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.269%, 1.541% and 1.796%, respectively, during the last auction of the month. Nevertheless, demand for short-term papers remained healthy as the BTr offered tap issuances for the 364-day paper every week.

In the local economic space, April inflation came in at 4.5% year-on-year, unchanged from March and slightly lower than the median forecast of 4.7%. For the first four months of the year, inflation averaged at 4.5%, higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Meanwhile, the country's 1st quarter GDP growth posted a 4.2% decline YoY, worse than analysts' expectations. The decline was led by falling consumer and government spending, as well as slower industrial and agricultural production. With the economy still in need of support and inflation deemed manageable, the BSP kept policy rates unchanged during its meeting held mid-May. BSP Governor Benjamin Diokno reiterated that the central bank would continue to utilize its full arsenal of tools to support growth and stability.

**Fund Performance.** The Fund returned 0.19% during the month, outperforming its benchmark by 10 bps. Meanwhile, the YTD the Fund returned 0.46%, outperforming the benchmark by 6 bps.

**Fund Strategy.** The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
