## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned 0.09% in November, even as benchmark short-term government yields rose 3.46 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising more than the long-end. Average daily trading volume rose to PHP15.762bn from October's PHP13.997bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held five Treasury Bill auctions in November. Treasury Bills saw yields inch slightly higher throughout the month, as investors looked to the potential for rising rates globally. However, preference for the shorter end of the curve prevailed as all the auctions continued to be oversubscribed. Average rates for the last auction of the 91-, 182- and 364-day papers were awarded at 1.164%, 1.449% and 1.636%, respectively, during the last auction of the month. Towards month-end, the BTr released its November auction schedule, announcing two FXTN issuances (10- and 7-year tenors) and three Tbill auctions.

In the local economic space, October inflation further eased to 4.6% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. Meanwhile, the country's GDP growth came in at +7.1% year-on-year, beating the consensus estimate of 4.8%. Growth was driven by the industrial service sectors, while the agricultural sector lagged due to bad weather and the African Swine Fever outbreaks. Though growth has proven robust in recent quarters, analysts believe there is room for the central bank to keep rates accommodative. Sure enough, during its Monetary Board meeting last November 18, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate at a record low, citing the need for continued monetary support for the economy. It likewise cut its projected 2022 inflation forecast to 4.3% from 4.4% originally.

**Fund Performance.** The Fund returned 0.06% during the month, below its benchmark by 2 bps. Meanwhile, the YTD the Fund returned 0.99%, outperforming the benchmark by 12 bps.

**Fund Strategy.** The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
