OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -2.48% in February, with benchmark government yields rising 57 basis points (bps) on average. The curvature of the yield curve increased, with benchmark yields in the belly of the curve rising with a greater magnitude than the rise in short- and long-term yields. Average daily trading volume fell to PHP23.4bn from January's PHP39.2bn, with the 4.5-year RTB5-13 and 9.4-year FXTN10-65 securities seeing the highest trading volumes over the month.

The Bureau of the Treasury (BTr) held two auctions in February. The first was a PHP30-bn reissuance of the 9.4-year security FXTN10-65 (first issued in July 2020); the second was the pricing auction for the March issuance of a new 3-year Retail Treasury Bond, RTB3-11. FXTN10-65 saw total bids of PHP63.05bn and was fully awarded at an average yield of 3.066%. Meanwhile, bids for the new RTB3-11 totaled PHP284.18bn, and the BTr accepted a total of PHP221.22bn worth of bids, awarded at an average yield of 2.375%. The RTB's offer period continues until its March 9 issuance.

In the local economic space, January inflation came in at 4.2% year-on-year, above expectations of 3.5% and quickening from December's 3.5% figure. Food inflation due to supply chain and logistical issues and higher transportation costs due to rising oil prices were the main drivers of the headline figure's increase. Meanwhile, President Duterte rejected calls to loosen quarantine restrictions, citing his desire for more widespread vaccination before easing restrictions. With spiking inflation and slow economic growth continuing to dampen risk sentiment, the Bangko Sentral ng Pilipinas (BSP) kept policy rates steady in its February meeting but raised its full-year 2021 inflation forecast to 4% from its previous forecast of 3.2%. In statements made throughout the month, BSP Governor Benjamin Diokno stated that the spike in inflation was transitory and was being dealt with through non-monetary measures, and suggested that policy rates would remain at current levels until at least the end of the first half of the year.

Fund Performance. The Fund returned -0.29% for the month, outperforming its benchmark by 12 basis points.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
