## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -0.35% in November, with benchmark government yields rising 10.44 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising while the long-end marginally fell. Average daily trading volume rose to PHP15.762bn from October's PHP13.997bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions (two 5-, 7-, and 10-year tenors) for the month. However, following strong demand for its 5.5-year Retail Treasury Bond issuance, the last two auctions (5- and 7-year) were cancelled. The new 5.5-year RTB 5-14 was initially awarded at a coupon rate of 4.625% with bid yields averaging at 4.564%. Total volume at the end of the offer period (concluded November 26) was at Php360billion, Php330.5 billion of which was raised in new money, while the rest was via bond exchange. Investors saw the successful issuance as a positive development for the local bond market, which pushed yields slightly lower towards month end. Average rates on the 5- and 10-year auctions were at 3.762% and 5.130% respectively.

In the local economic space, October inflation further eased to 4.6% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory. Meanwhile, the country's GDP growth came in at +7.1% year-on-year, beating the consensus estimate of 4.8%. Growth was driven by the industrial service sectors, while the agricultural sector lagged due to bad weather and the African Swine Fever outbreaks. Though growth has proven robust in recent quarters, analysts believe there is room for the central bank to keep rates accommodative. Sure enough, during its Monetary Board meeting last November 18, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate at a record low, citing the need for continued monetary support for the economy. It likewise cut its projected 2022 inflation forecast to 4.3% from 4.4% originally.

**Fund Performance.** The Fund returned -0.36% for the month, slightly underperforming its benchmark by 2 basis points.

**Fund Strategy.** The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
