OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.82% in September, with benchmark government yields rising 25.99 basis points (bps) on average. The yield curve steepened once more, with rates on the long-end of the curve rising more than those of the belly or the short-end. Average daily trading volume dropped to PHP18.615bn from August's PHP22.20bn with trades mostly seen on the short-end and belly (1- to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions (5-, two 7-, and two 10-year tenors) and four Treasury Bill auctions in September. Demand was quite healthy across all the auctions with bids amounting to nearly double the original offered volumes, but market players were clearly seeking higher yields. Average rates on the first and second 7-year auctions were at 3.789% and 3.826% respectively, while average rates on the first and second 10-year auctions were at 4.246% and 4.689%, respectively. High volumes tendered led the BTr to open tap issuances across all the auctions, though only some were successful. Towards month-end, the BTr released its October auction schedule, announcing four weekly FXTN issuances (5-, 6- and two 7-year tenors) and four weekly T-bill auctions.

In the local economic space, August inflation increased to 4.9% year-on-year, the fastest rise in over two years. The uptick was driven by higher food and utility prices following the government's move into stricter lockdowns once more. The figure marks yet another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. During its Monetary Board meeting for the month, the BSP left policy rates unchanged, but hiked its inflation forecasts. For 2021, it now expects inflation to average at 4.4% from 4.1%, while for 2022 it now projects inflation to average at 3.3% from 3.1% earlier. Nevertheless, the BSP continued to reiterate that prevailing monetary policy settings were still appropriate, given the manageable inflation environment and tempered growth outlook.

Fund Performance. The Fund returned -0.15% for the month, below its benchmark by 13 basis points.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
