INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to generate liquidity and stable income by investing in a diversified portfolio of primarily short-term fixed income instruments. The Fund aims to provide excess return over the return of the 91-day Philippine Treasury Bill, net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Invest Short Term Fund is suitable only for investors who:

- Are at least classified as moderately conservative based on their risk profile
- Have an investment horizon of at least one (1) year

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

**• THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.16% in January as money market benchmark yields fell 7 basis points (bps) on average, with the greatest yield declines seen in the 12- and 6-month benchmark tenors.

The Bureau of the Treasury (BTr) sold four tranches of Treasury Bills (T-bills) over the month's course, with each tranche comprising PHP5-7bn of 91-day, PHP7bn of 182-day, and PHP10bn of 364-day securities. Demand for all tenors increased as the month progressed, and all auctions were fully awarded. Between the last auctions in this month and the previous month, yields for the 3- and 6-month securities fell 5-8 bps, while the yield of the 1-year security fell 14 bps. In the last auction of the month, the 91-, 182-, and 364-day securities were awarded at average yields of 0.969%, 1.323%, and 1.542%, respectively.

In the local economic space, December inflation came in at 3.5% year-on-year, above expectations of 3.2% and bringing full-year 2020 average inflation to 2.6%. Food inflation continued to spike, driven by supply constraints due to the effects of inclement weather and the African Swine Flu. The Philippine full-year GDP figure also disappointed, with fourth-quarter year-on-year growth at -8.3%, bringing the full-year 2020 growth figure to an all-time low of -9.5%. Weak demand and capital formation were the main causes of the decline, as pandemic-related mobility constraints impeded spending and lowered demand expectations, causing companies to cut capital expenditures. The negative growth and high inflation figures, together with doubts about local vaccine acquisition and distribution capability, impaired local risk sentiment, driving investors into safer assets and pushing risk asset prices lower. With its policy rate at record lows and with the possibility of transitorily higher inflation, the Bangko Sentral ng Pilipinas (BSP) is expected to remain accommodative but maintain current policy. In statements made throughout the month, BSP Governor Benjamin Diokno continued to emphasize the bank's focus on supporting growth using the full range of policy tools at its disposal.

Fund Performance. The Fund returned 0.04% during the month, behind benchmark by 0.04%.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates.
