OUTLOOK AND STRATEGY

Market Review. Global equities rebounded in October as investors focused on robust corporate earnings over concerns on inflation and the path of economic recovery. Markets reached new highs driven by the sentiment over the solid earnings season, but price pressures remained as supply and energy shortages continue to weigh on manufacturing and production. The Federal Reserve kept rates steady and maintained the current pace of asset purchases, reiterating that tapering can begin as early as mid-November or December until mid-2022. The committee also raised the inflation outlook but believed that elevated inflation is transitory. In terms of fiscal policy, the US House of Representatives approved a short-term increase in the debt ceiling by \$480 billion, allowing the US Treasury department to fulfill its obligations until December 3. Global economic data remained mixed, reflecting a slowdown in some regions. Initial jobless claims in the US dropped and continued a downward trend while business activity slowed in the Eurozone and China, driven by rising costs due to power shortages and rising commodity prices. Eurozone's composite PMI decreased from 56.2 to 54.3 while China's manufacturing PMI declined to 49.2, signaling a contraction in the manufacturing sector. In commodity markets, coal, crude, and natural gas prices continued to surge to multi-year highs as demand increased due to reopening economies and the incoming winter season. Global supply chains remain under pressure and may worsen as the energy shortage hampers production.

Fund Performance. The fund returned 5.79% in October, lagging the benchmark by 87 basis points. Security selection within the internet sub-sector detracted from performance.

Fund Strategy. The fund will continue to focus on long-term secular themes, many of which are experiencing increased demand as global enterprises push for modernization and digitalization, while also taking advantage of attractive valuations of cyclical names which are expected to benefit as the market recovers. The fund will maintain its exposure to trends whose pace of adoption have accelerated due to social distance and migration to remote work, such as cloud computing, e-commerce and gaming.
