A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Corporate Income Fund is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

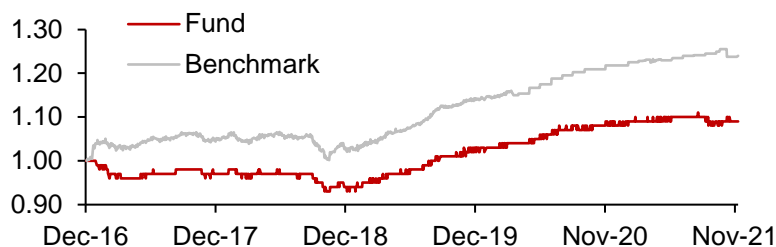

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.35% in November, with benchmark government yields rising 10.44 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising while the long-end marginally fell. Average daily trading volume rose to PHP15.762bn from October's PHP13.997bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions (two 5-, 7-, and 10-year tenors) for the month. However, following strong demand for its 5.5-year Retail Treasury Bond issuance, the last two auctions (5- and 7-year) were cancelled. The new 5.5-year RTB 5-14 was initially awarded at a coupon rate of 4.625% with bid yields averaging at 4.564%. Total volume at the end of the offer period (concluded November 26) was at Php360billion, Php330.5 billion of which was raised in new money, while the rest was via bond exchange. Investors saw the successful issuance as a positive development for the local bond market, which pushed yields slightly lower towards month end. Average rates on the 5- and 10-year auctions were at 3.762% and 5.130% respectively. The BTr also released its December auction schedule, announcing just two FXTN issuances (10- and 7-year tenors) and three Tbill auctions.

In the local economic space, October inflation further eased to 4.6% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. Meanwhile, the country's GDP growth came in at +7.1% year-on-year, beating the consensus estimate of 4.8%. Growth was driven by the industrial service sectors, while the agricultural sector lagged due to bad weather and the African Swine Fever outbreaks. Though growth has proven robust in recent quarters, analysts believe there is room for the central bank to keep rates accommodative. Sure enough, during its Monetary Board meeting last November 18, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate at a record low, citing the need for continued monetary support for the economy. It likewise cut its projected 2022 inflation forecast to 4.3% from 4.4% originally.

Fund Performance. The Fund underperformed its benchmark by 112 bps in November.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
