A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Corporate Income Fund is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.01% in October, with benchmark government yields rising 21.76 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising more than the long-end. Average daily trading volume dropped to PHP13.997bn from September's PHP18.615bn with trades mostly seen on the short-end (3 months to 1 year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (two 7-, 6-, and 5-year tenors) and four Treasury Bill auctions in October. Demand was moderate across all the auctions with bids amounting to less than double the original offered volumes, but market players were clearly seeking higher yields. Average rates on the first and second 7-year auctions were at 4.207% and 4.468% respectively, while average rates on the 5-year auction was at 3.576%. Meanwhile, the 5.5-year auction was fully rejected as investors bid for higher rates. Towards month-end, the BTr released its November auction schedule, announcing four weekly FXTN issuances (10-, 7- and two 5-year tenors) and four weekly Tbill auctions.

In the local economic space, September inflation eased to 4.8% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. The figure marks yet another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Nevertheless, the BSP continues to reiterate that prevailing monetary policy settings are still appropriate, given the current inflation environment and tempered growth outlook.

Fund Performance. The Fund outperformed its benchmark by 187 bps in October.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:
