OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) rallied on the month of August, rising by 9.3% to 6,855.44. It was mainly due to renewed interest in the market after a 9.2% decline in the previous month. Gains were across the board with 26 out of the 30 index names ending in the green. During the month, the Philippine Stock Exchange conducted its semi-annual review where we saw AC Energy Corp (ACEN) and Converge ICT Solutions Inc (CNVRG) making its way in the index replacing DMCI Holdings and Emperador Inc. Moreover, the rally was led by the outperformance of the telecommunications sector particularly GLO and TEL as demand for broadband services remain robust on mobility constraints coupled with investors' excitement over the telcos' fintech units.

August saw a spike in activity with Average Daily Turnover rising by 28.20% to US\$150 million. Meanwhile, we finally saw foreigners' net position to a "buy" at US\$32 million, bucking the trend of consecutive months of net foreign selling.

In terms of individual stock performances, main advancers were: GLO (+46.24%), CNVRG (+35.96%) and AP (+20.69%); while the main laggards include: LTG (-12.49%), RRHI (-5.03%) and FGEM (-2.41%).

Fund Performance. The fund outperformed its benchmark by 101 basis points in August with a return of 10.34%.

Fund Strategy. Despite seeing a rally in the past month, we will still anticipate volatility brought about by the surging COVID-19 Delta Variant. However, we remain to be strategic long-term buyers of Philippine equities. We favor quality names or position on cyclical. We will continue to be nimble and buy on market dips.
