OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange continued to rise for another month, climbing by 1.4% to 6,952.88 in September. This was mainly attributed to passive flows (FTSE rebalancing) coupled with improved market sentiment due to easing of quarantine restrictions in the Nation's capital. The index was knocking on the 7,000 door but can't get over hump as selling pressure was apparent. Moreover, concerns on the global front kept investors grounded with China Evergrande and worries on the U.S Federal Reserve Tightening.

September saw an increase in activity level with Average Daily Turnover registering at US\$175 million or 16.7% higher than in August. Foreigners turned net sellers yet again at US\$47.7 million.

In terms of individual stock performance, main advancers were :CNVRG (+29.03%), followed by FGEN (+19.96%) and LTG (+18.13%). Meanwhile, the biggest laggard were the following: URC (-9.88%), SECB (-6.36%) and GTCAP (-5.56%).

Fund Performance. The fund underperformed its benchmark by 38 basis points in September with a return of 1.04%.

Fund Strategy. While the market continues to rise taking cue on a seemingly improving environment, we will still anticipate volatility as COVID-19 is not fully under control. However, we remain strategic long-term buyers of Philippine equities that favor quality names and with position on cyclical. We will continue to be nimble and buy on market dips.
