OUTLOOK AND STRATEGY

Market Review: The BPI Government Bond Index returned 0.93% in June, with benchmark government yields dropping 15.48 basis points (bps) on average. The yield curve steepened somewhat, with rates on the short-end and belly of the curve declining while yields on the long-end of the curve rose. Average daily trading volume rose to PHP27.99bn from May's PHP21.01bn, as investors sought to deploy proceeds from the maturity of jumbo issuance RTB3-9. Trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (20-, 7, 10- and 11.7-year tenors) and four Treasury Bill auctions in June. Demand was quite healthy across all four FXTNs, with bid volumes considerably higher than offered amounts. However, reception to the BTr's tap offerings were luke-warm to mixed. Average yields for the reissued FXTN25-11, FXTN7-64, FXTN10-65 and FXTN20-20 were awarded at 5.084%, 3.685%, 3.719% and 4.187%, respectively. Meanwhile, the Treasury Bills saw yields falling gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.031%, 1.332% and 1.563%, respectively, during the last auction of June. Towards month-end, the BTr released its July auction schedule, once again announcing five weekly FXTN issuances (11-, 7-, 20-, 10-, and 7-year tenors) and four weekly Tbill auctions. News of further supply caused the long-end of the curve to sell off slightly.

In the local economic space, May inflation came in at 4.5% year-on-year, unchanged from April and in-line with the median forecast. This marked the 5th straight month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices due to the African Swine Fever outbreak kept the food prices overall elevated. Transport costs likewise remained high due to global fuel prices. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Consequently, the central bank maintained its policy rates at the current record lows during its Monetary Policy meeting concluded last June 24. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

Fund Performance: The Fund returned 0.81% during the month, below its benchmark by 12 basis point.

Fund Strategy: The Fund looks to move to a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
