OUTLOOK AND STRATEGY

Market Review: The BPI Government Bond Index returned 0.50% in July, with benchmark government yields dropping 5.47 basis points (bps) on average. The yield curve flattened, with rates on the short-end of the curve rising while yields on the belly and long-end of the curve declined. Average daily trading volume fell to PHP20.60bn from June's PHP27.99bn with trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (20-, 10- and 2 11.7-year tenors) and four Treasury Bill auctions in June. Demand was quite healthy across all four FXTNs, with bid volumes considerably higher than offered amounts. However, reception to the BTr's tap offerings were luke-warm to mixed. There were 2 newly issued papers last month, the partially awarded 20-year FXTN20-24 (coupon of 5.125% with average yield of 5.085%) and the fully awarded 10-year FXTN10-66 (coupon of 4.000% with average yield of 3.920%). Meanwhile, average yields for the twice reissued FXTN7-64 were awarded at 3.576% and 3.651%, respectively. Towards month-end, the BTr released its August auction schedule, announcing four weekly FXTN issuances (10-, 7-, 20-, and 11-year tenors) and four weekly Tbill auctions.

In the local economic space, June inflation fell to 4.1% year-on-year, compared to May's 4.5% and lower than the median forecast. Though it declined, the figure marks another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices persisted due to the ongoing supply pressures brought about by the African Swine Fever outbreak. Meanwhile, transport costs eased due to base effects from last year. The BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

Fund Performance: The Fund returned 0.00% during the month, below its benchmark by 50 basis point.

Fund Strategy: The Fund looks to move to a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
