INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its participants liquidity and stable income derived from a diversified portfolio of primarily short-term fixed income instruments. The Fund aims to provide returns in excess of the return of the 91-day Philippine Treasury Bill.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Money Market Fund is suitable only for investors who:

- Are classified as moderate based on their risk profile
- Have an investment horizon of at least three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.21% in June, as short-end benchmark government yields fell 17.98 basis points (bps) on average. The yield curve steepened somewhat, with rates on the short-end of the curve declining while yields on the belly and long-end of the curve rose. Average daily trading volume rose to PHP27.99bn from May's PHP21.01bn, as investors sought to deploy proceeds from their maturity of the jumbo issuance RTB3-9. Trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in April. Treasury Bills saw yields falling gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.031%, 1.332% and 1.563%, respectively, during the last auction of the month. Nevertheless, demand for short-term papers remained healthy as total tenders for each tenor more than doubled the offer size during the weekly auctions. Towards month-end, the BTr released its July auction schedule, once again announcing five weekly FXTN issuances (11-, 7-, 20-, 10-, and 7-year tenors) and four weekly Tbill auctions. News of further supply caused the long-end of the curve to sell off slightly.

In the local economic space, May inflation came in at 4.5% year-on-year, unchanged from April and in-line with the median forecast. This marked the 5th straight month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices due to the African Swine Fever outbreak kept the food prices overall elevated. Transport costs likewise remained high due to global fuel prices. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Consequently, the central bank maintained its policy rates at the current record lows during its Monetary Policy meeting concluded last June 24. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

Fund Performance. The Fund returned 0.00% during the month, below its benchmark by 8 basis points.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of monetary easing moving forward may depress short-term rates
