KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.93% in June, with benchmark government yields dropping 15.48 basis points (bps) on average. The yield curve steepened somewhat, with rates on the short-end and belly of the curve declining while yields on the long-end of the curve rose. Average daily trading volume rose to PHP27.99bn from May's PHP21.01bn, as investors sought to deploy proceeds from the maturity of jumbo issuance RTB3-9. Trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (20-, 7, 10- and 11.7-year tenors) and four Treasury Bill auctions in June. Demand was quite healthy across all four FXTNs, with bid volumes considerably higher than offered amounts. However, reception to the BTr's tap offerings were luke-warm to mixed. Average yields for the reissued FXTN25-11, FXTN7-64, FXTN10-65 and FXTN20-20 were awarded at 5.084%, 3.685%, 3.719% and 4.187%, respectively. Meanwhile, the Treasury Bills saw yields falling gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.031%, 1.332% and 1.563%, respectively, during the last auction of June. Towards month-end, the BTr released its July auction schedule, once again announcing five weekly FXTN issuances (11-, 7-, 20-, 10-, and 7-year tenors) and four weekly Tbill auctions. News of further supply caused the long-end of the curve to sell off slightly.

In the local economic space, May inflation came in at 4.5% year-on-year, unchanged from April and in-line with the median forecast. This marked the 5th straight month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices due to the African Swine Fever outbreak kept the food prices overall elevated. Transport costs likewise remained high due to global fuel prices. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Consequently, the central bank maintained its policy rates at the current record lows during its Monetary Policy meeting concluded last June 24. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

The Philippine Stock Exchange Index (PSEi) rose by 4.1% in June as market players cheered on the prospects of the country's reopening on the back of improving vaccination rates. This is expected to accelerate further as more doses come in the following months. In July, we are expecting another 13.3 million doses while 13.6 million doses are coming in August. Volume spiked by 13.8% to US\$165m average daily turnover. In terms of foreign activity, foreigners remained as net sellers at US\$80 million, stretching the year-to-date figure to US\$1.545 billion.

Macro-economic news for the month include: (1) Inflation registered at 4.5% in May, higher than the government's target of 2-4%. The rise was brought about by increases in prices of meat, particularly pork. (2) The Bangko Sentral ng Pilipinas (BSP) maintained its key policy rates. The Monetary board revealed that the overall economic recovery remained tentative but saw some improvements in the past weeks.

In terms of individual stock performances, main advancers were: ICT (+14.40%), DMC (+13.13%) and SCC (+12.18%); while the main laggards include: LTG (-6.52%), SECB (-3.28%) and BLOOM (-2.54%).

Fund Performance. The Fund registered a gain of 2.17% in June, underperforming the benchmark by 37 bps. Meanwhile, the YTD performance of the Fund reported a loss of 3.17%, underperforming the benchmark by 85 bps.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We look to remain strategic long-term buyers of Philippine equities, hinging on a more concrete reopening narrative post-vaccination. We favor quality names or position on cyclicals. We will continue to be nimble and buy on market dips.
