KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.01% in October, with benchmark government yields rising 21.76 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising more than the long-end. Average daily trading volume dropped to PHP13.997bn from September's PHP18.615bn with trades mostly seen on the short-end (3 months to 1 year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (two 7-, 6-, and 5-year tenors) and four Treasury Bill auctions in October. Demand was moderate across all the auctions with bids amounting to less than double the original offered volumes, but market players were clearly seeking higher yields. Average rates on the first and second 7-year auctions were at 4.207% and 4.468% respectively, while average rates on the 5-year auction was at 3.576%. Meanwhile, the 5.5-year auction was fully rejected as investors bid for higher rates. Towards month-end, the BTr released its November auction schedule, announcing four weekly FXTN issuances (10-, 7- and two 5-year tenors) and four weekly Tbill auctions.

In the local economic space, September inflation eased to 4.8% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory, though some analysts continued to warn that this was just a blip and higher prices ought to be expected moving forward, given elevated global oil prices. The figure marks yet another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Nevertheless, the BSP continues to reiterate that prevailing monetary policy settings are still appropriate, given the current inflation environment and tempered growth outlook.

The Philippine Stock Exchange Index climbed yet again on improved market sentiment as optimism in the country's re-opening shifts to another gear. The country is experiencing continuous drop in the number of COVID-19 cases and thus translating to further easing of restrictions which helps boost the economy. The local bell-weather index rose by 1.46% to close at 7,054.70.

The market was more active in October after registering an Average Value Turnover of US\$202.53 or 15.7% higher than September. One of the main proponents of this higher activity was the deletion of First Gen Corp (FGEN) shortly after its tender offer. This was replaced by Wilcon Depot, Inc. (WLCON).

In terms of foreign activity, we saw foreigners turned net buyers this month at US\$8.02 million. This was buoyed by Megaworld REIT IPO and a block transaction of Union Bank. Otherwise, it would be another foreign selling month.

In terms of individual stock performance, main advancers were: RRHI (+20.17%), JFC (+14.73%), and BLOOM (+14.48%) while laggards were CNVRG (-20.50%), ICT (-7.69%) and JGS (-7.38%)

Fund Performance. The Fund registered a gain of 0.26% in October, outperforming the benchmark by 51 bps. Meanwhile, the YTD performance of the Fund reported a loss of 3.72%, underperforming the benchmark by 150 bps.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We remain strategic long-term buyers of Philippine equities that favor quality names and with position on cyclical. We will continue to be nimble and take advantage on tactical opportunities.

LIST OF PROSPECTIVE INVESTMENTS
