KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.84% in April, with benchmark government yields dropping 12 basis points (bps) on average. The yield curve flattened, with rates in the belly and long-end of the curve declining while short-term yields rose slightly. Average daily trading volume rose to PHP19.84bn from March's PHP18.66bn, with the 4.5-year RTB5-13 and the newly issued RTB3-11 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions and four Treasury Bill auctions in April. The first FXTN auction was a PHP35-bn issuance of a new 7-year security FXTN7-64; the second was another PHP35-bn issuance of a new 5-year security FXTN5-77. Average bid yields were at 3.529% and 3.301%, respectively, while coupons were at 3.625% and 3.375%, respectively. Market demand was quite strong with bids exceeding PHP80-bn for each. The BTr opened a PHP25-bn tap issuance for the FXTN7-64 which was fully awarded after bids amounted to nearly double the offered size. Meanwhile, the Treasury Bills saw yields rising gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.369%, 1.714% and 1.880%, respectively, during the last auction of the month.

In the local economic space, March inflation eased to 4.5% year-on-year, slightly lower than February's 4.7% figure and putting an end to the 5-month streak of monthly price accelerations. The slowdown was mainly attributed to food and non-alcoholic beverage prices, though the Philippine Statistics Authority noted more tempered increases across all other price categories as well. Bangko Sentral ng Pilipinas (BSP) Governor Benjamin Diokno noted that the current level of inflation was still "consistent with expectations", adding that "inflation could settle above the high end of the target in 2021, reflecting the impact of supply-side constraints". Meanwhile, local coronavirus (COVID) infections continued to surge to new highs – peaking at 10,686 new cases in a day -- which prompted President Duterte to further extend various iterations of Community Quarantine across the country. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) maintains that its current monetary policy is still appropriate. Governor Diokno reiterated that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

The Philippine Stock Exchange Index (PSEi) stumbled by 1.1% to 6,370.87 over the worsening situation of the pandemic. The country grappled with record-daily highs of new infections that battered the overall healthcare system. The government in turn, responded by renewing tight lockdowns to control the spread of infections. However, a ray of light seemed to pierce through the seemingly dark tunnel over the on-going vaccination program, though at a much slower pace due to delayed deliveries of the vaccines.

Volume was down for another month, with average daily turnover was 43.6% lower month-on-month at US\$115 million. In terms of foreign activity, net selling was yet again the main story, registering at US\$171 in April.

Macro-economic news for the month are as follows: 1) CPI rose at 4.5% in March, lower than the 4.7% increase in February. The ease was mainly due to lower inflation on food, particularly fish, fruits and vegetables. Utilities prices also moderated but was countered by increased transportation cost due to higher fuel prices. 2) Remittances from OFWs rose by 5% to US\$2.47bn in February. 3) The country's budget deficit widened to Php191 billion in March with Revenues dipping 17% year-on-year due to base effects from last year's dividend remittances to fund Bayanihan 1. Moreover, expenditure inched 22% higher year-on-year mainly due to infrastructure disbursements.

In terms of individual stock performances, main advancers were: MPI (+8.3%), ICT (+7.4%) and TEL (+4.5%); while the main laggards were: MEG (-12%), JGS (-11.7%) and RLC (-8.39%).

Fund Performance. The Fund registered a loss of 0.03% in April, underperforming the benchmark by 29 bps. Meanwhile, the YTD performance of the Fund reported a loss of 5.40%, underperforming the benchmark by 6 bps.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We look to remain strategic long-term buyers of Philippine equities, in hopes of a successful vaccine rollout. However, we will adopt a defensive stance tactically amidst the rising volatility from the negative fundamental views and indexes rebalancing. Will continue to be nimble and buy on market dips.
