**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

**Equity Price Risk:** Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned 0.50% in July, with benchmark government yields dropping 5.47 basis points (bps) on average. The yield curve flattened, with rates on the short-end of the curve rising while yields on the belly and long-end of the curve declined. Average daily trading volume fell to PHP20.60bn from June's PHP27.99bn with trades were mostly seen on the short-end (Treasury Bills) and belly (3 to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (20-, 10- and 2 11.7-year tenors) and four Treasury Bill auctions in June. Demand was quite healthy across all four FXTNs, with bid volumes considerably higher than offered amounts. However, reception to the BTr's tap offerings were luke-warm to mixed. There were 2 newly issued papers last month, the partially awarded 20-year FXTN20-24 (coupon of 5.125% with average yield of 5.085%) and the fully awarded 10-year FXTN10-66 (coupon of 4.000% with average yield of 3.920%). Meanwhile, average yields for the twice reissued FXTN7-64 were awarded at 3.576% and 3.651%, respectively. Towards month-end, the BTr released its August auction schedule, announcing four weekly FXTN issuances (10-, 7-, 20-, and 11-year tenors) and four weekly Tbill auctions.

In the local economic space, June inflation fell to 4.1% year-on-year, compared to May's 4.5% and lower than the median forecast. Though it declined, the figure marks another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. Bloated pork prices persisted due to the ongoing supply pressures brought about by the African Swine Fever outbreak. Meanwhile, transport costs eased due to base effects from last year. The BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. BSP Governor Benjamin Diokno has continuously reiterated that the central bank would utilize its full arsenal of tools to support growth and stability.

The Philippine Stock Exchange (PSEi) took a huge hit in July, dropping by 9.20% to 6,270.23 on fears of another wave of COVID-19 sparked by the rising delta variant cases. Credit rating agency, Fitch, maintained the country's BBB rating but revised the outlook from stable to "negative" also weighed-in on investor concerns. Volume was thinner for July with Average Daily Turnover at US\$117 million or 19.3% lower month-on-month. Foreigners were net sellers yet again, registering at US\$184.5 million for the month.

In terms of individual stock performances, main advancers were: EMP (+9.22%), and GLO (+1.09%); while the main laggards include: LTG (-24.26%), MEG (-14.24%) and SMPH (-13.04%).

**Fund Performance.** The Fund registered a loss of 2.79% in July, underperforming the benchmark by 34 bps. Meanwhile, the YTD performance of the Fund reported a loss of 5.25%, underperforming the benchmark by 83 bps.

**Fund Strategy.** The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We anticipate further volatility due to threat of the rising delta variant. Despite this, we are still strategic long-term buyers of Philippine equities. We favor quality names or position on cyclicals. We will continue to be nimble and buy on market dips.
