INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve capital appreciation and income growth in Philippine Peso terms over a period of time by investing in a diversified portfolio of Philippine Peso denominated fixed income instruments. The Fund aims to outperform its benchmark which is the BPI Philippine Government Bond Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Peso Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

Investments in the said outlets were approved by the BPI AMTC's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

* Related party in accordance with BPI AMTC's internal policy.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.21% in January, with benchmark government yields rising 1 basis point (bp) on average. The yield curve pivoted steeper, with benchmark yields on the short end of the curve declining as longer-term benchmark yields rose. Average daily trading volume rose to PHP39.2bn, from December's PHP26.4bn, with the 4.6-year RTB5-13 and 4.7-year FXTN10-60 securities seeing the highest trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions in January, with PHP30bn on offer for each. The first was a reissuance of the 4.7-year security FXTN10-60 (first issued in September 2015); the second was a reissuance of the 6.3-year security FXTN10-61 (first issued in May 2017). Both reissuances saw strong demand and were fully awarded; FXTN10-60 saw total bids of PHP98.7bn and was awarded at an average yield of 2.536%, 36 bps lower than the average yield at which it was awarded in its previous reissuance in November 2020. Meanwhile, FXTN10-61 saw bids totaling PHP82.6bn, and was awarded at an average yield of 2.719%, 7 bps lower than its average yield when it was last reissued in December 2020.

In the local economic space, December inflation came in at 3.5% year-on-year, above expectations of 3.2% and bringing full-year 2020 average inflation to 2.6%. The Philippine full-year GDP figure also disappointed, with fourth-quarter year-on-year growth at -8.3%, bringing the full-year 2020 growth figure to an all-time low of -9.5%. The negative growth and high inflation figures, together with doubts about local vaccine acquisition and distribution capability, impaired local risk sentiment, driving investors into safer assets and pushing risk asset prices lower. With its policy rate at record lows and with the possibility of transitorily higher inflation, the Bangko Sentral ng Pilipinas (BSP) is expected to remain accommodative but maintain current policy. In statements made throughout the month, BSP Governor Benjamin Diokno continued to emphasize the bank's focus on supporting growth using the full range of policy tools at its disposal.

Fund Performance. The Fund outperformed its benchmark by 7 basis points, returning 0.31% for the month.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- a) Bank deposits and such other investments allowed under regulations issued by theBSP;
