INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve capital appreciation and income growth in Philippine Peso terms over a period of time by investing in a diversified portfolio of Philippine Peso denominated fixed income instruments. The Fund aims to outperform its benchmark which is the BPI Philippine Government Bond Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Peso Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

Investments in the said outlets were approved by the BPI AMTC's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

* Related party in accordance with BPI AMTC's internal policy.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.48% in May, with benchmark government yields dropping 2.6 basis points (bps) on average. The yield curve steepened somewhat, with rates on the short-end of the curve declining while yields on the belly and long-end of the curve rose. Average daily trading volume rose to PHP21.01bn from April's PHP19.84bn, with the 4.5-year RTB5-13 and the newly issued FXTN5-77 and FXTN7-64 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions and four Treasury Bill auctions in April. The first FXTN auction was a PHP35-bn reissuance of the 5-year security FXTN5-77 (coupon of 3.375%); the second was another PHP35-bn reissuance of the 7-year security FXTN7-64 (coupon of 3.625%). Average bid yields were at 3.295% and 3.678%, respectively. Market demand was quite strong with bids exceeding PHP70-bn for each. The BTr opened a PHP10-bn tap issuance for each of the papers, fully awarded after bids for both auctions amounted to more than double the offered sizes. Meanwhile, the Treasury Bills saw yields falling gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.269%, 1.541% and 1.796%, respectively, during the last auction of the month.

In the local economic space, April inflation came in at 4.5% year-on-year, unchanged from March and slightly lower than the median forecast of 4.7%. For the first four months of the year, inflation averaged at 4.5%, higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. However, the BSP noted that this was still in line with its projection of elevated prices given supply side pressures on food, and that by 2022 prices should stabilize. Meanwhile, the country's 1st quarter GDP growth posted at 4.2% decline YoY, worse than analysts' expectations. The decline was led by falling consumer and government spending, as well as slower industrial and agricultural production. With the economy still in need of support and inflation deemed manageable, the BSP kept policy rates unchanged during its meeting held mid-May. BSP Governor Benjamin Diokno reiterated that the central bank would continue to utilize its full arsenal of tools to support the economy.

Fund Performance. The Fund underperformed its benchmark by 36 basis points, returning 0.12% for the month.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- a) Bank deposits and such other investments allowed under regulations issued by theBSP;
- b) Securities issued by or guaranteed by the Philippine government, or by the BSP;
- c) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- d) Tradable securities issued by the government of a foreign country, any political subdivision of a foreign country or any supranational entity;
- e) Exchange-listed securities;
- f) Marketable instruments that are traded in an organized exchange;
- g) Loans traded in an organized market;
- h) Such other tradable investments outlets/categories as may be approved by the relevant authority and allowed by the BSP; and
- i) Allowable investments denominated in any acceptable foreign currency.
