INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve capital appreciation and income growth in Philippine Peso terms over a period of time by investing in a diversified portfolio of Philippine Peso denominated fixed income instruments. The Fund aims to outperform its benchmark which is the BPI Philippine Government Bond Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Peso Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

* Related party in accordance with BPI AMTC's internal policy.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.35% in November, with benchmark government yields rising 10.44 basis points (bps) on average. The yield curve flattened, with rates on the short-end and belly of the curve rising while the long-end marginally fell. Average daily trading volume rose to PHP15.762bn from October's PHP13.997bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions (two 5-, 7-, and 10-year tenors) for the month. However, following strong demand for its 5.5-year Retail Treasury Bond issuance, the last two auctions (5- and 7-year) were cancelled. The new 5.5-year RTB 5-14 was initially awarded at a coupon rate of 4.625% with bid yields averaging at 4.564%. Total volume at the end of the offer period (concluded November 26) was at Php360billion, Php330.5 billion of which was raised in new money, while the rest was via bond exchange. Investors saw the successful issuance as a positive development for the local bond market, which pushed yields slightly lower towards month end. Average rates on the 5- and 10-year auctions were at 3.762% and 5.130% respectively.

In the local economic space, October inflation further eased to 4.6% year-on-year, as the rise in food and transport prices slowed. The lower figure was a welcome development as there were speculations that inflation was not transitory. Meanwhile, the country's GDP growth came in at +7.1% year-on-year, beating the consensus estimate of 4.8%. Growth was driven by the industrial service sectors, while the agricultural sector lagged due to bad weather and the African Swine Fever outbreaks. Though growth has proven robust in recent quarters, analysts believe there is room for the central bank to keep rates accommodative. Sure enough, during its Monetary Board meeting last November 18, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate at a record low, citing the need for continued monetary support for the economy. It likewise cut its projected 2022 inflation forecast to 4.3% from 4.4% originally.

Fund Performance. The Fund outperformed its benchmark by 17 basis points, returning -0.18% for the month.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- a) Bank deposits and such other investments allowed under regulations issued by theBSP;
