**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund aims to achieve capital appreciation and income growth in Philippine Peso terms over a period of time by investing in a diversified portfolio of Philippine Peso denominated fixed income instruments. The Fund aims to outperform its benchmark which is the BPI Philippine Government Bond Index.

**CLIENT SUITABILITY**

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Peso Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -0.82% in September, with benchmark government yields rising 25.99 basis points (bps) on average. The yield curve steepened once more, with rates on the long-end of the curve rising more than those of the belly or the short-end. Average daily trading volume dropped to PHP18.615bn from August's PHP22.20bn with trades mostly seen on the short-end and belly (1- to 7-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions (5-, two 7-, and two 10-year tenors) and four Treasury Bill auctions in September. Demand was quite healthy across all the auctions with bids amounting to nearly double the original offered volumes, but market players were clearly seeking higher yields. Average rates on the first and second 7-year auctions were at 3.789% and 3.826% respectively, while average rates on the first and second 10-year auctions were at 4.246% and 4.689%, respectively. High volumes tendered led the BTr to open tap issuances across all the auctions, though only some were successful. Towards month-end, the BTr released its October auction schedule, announcing four weekly FXTN issuances (5-, 6- and two 7-year tenors) and four weekly Tbill auctions.

In the local economic space, August inflation increased to 4.9% year-on-year, the fastest rise in over two years. The uptick was driven by higher food and utility prices following the government's move into stricter lockdowns once more. The figure marks yet another month that inflation has been higher than the Bangko Sentral ng Pilipinas' (BSP) target band of 2-4% for the year. During its Monetary Board meeting for the month, the BSP left policy rates unchanged, but hiked its inflation forecasts. For 2021, it now expects inflation to average at 4.4% from 4.1%, while for 2022 it now projects inflation to average at 3.3% from 3.1% earlier. Nevertheless, the BSP continued to reiterate that prevailing monetary policy settings were still appropriate, given the manageable inflation environment and tempered growth outlook.

**Fund Performance.** The Fund outperformed its benchmark by 1 basis point, returning -0.81% for the month.

**Fund Strategy.** The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
