**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** The fund invests in a medium term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -1.63% in March, with benchmark government yields rising 43 basis points (bps) on average. The yield curve steepened, with rates in the belly and long-end of the curve rising with a greater magnitude than the rise in short-term yields. Average daily trading volume fell to PHP18.66bn from February's PHP23.4bn, with the 4.5-year RTB5-13 and the newly issued RTB3-11 seeing strong trading volumes over the month.

The Bureau of the Treasury (BTr) held two FXTN auctions and five Treasury Bill auctions in March. The first FXTN auction was a PHP30-bn reissuance of the 7-year security FXTN10-61; the second was another PHP30-bn reissuance of the 10-year security FXTN10-65. Average yields awarded were at 3.732% and 4.614%, respectively, both higher than prior auctions of similar tenors. Market demand was quite strong for both with bids exceeding PHP50-bn each. Meanwhile, the Treasury Bills saw yields rising gradually across all three tenors, with average rates for the 91-, 182- and 364-day papers awarded at 1.269%, 1.609% and 1.926%, respectively, during the last auction of the month.

In the local economic space, February inflation accelerated to 4.7% year-on-year, quickening from January's 4.2% figure and marking the 5th straight monthly increase. The rise was mainly attributed to food and non-alcoholic beverage prices, as the cost of meat spiked by 20%. Transport prices also contributed, as global oil prices saw an 18% increase. Meanwhile, local coronavirus (COVID) infections spiked to as much as 10,000 new cases per day, which prompted President Duterte to announce yet another lockdown ahead of the Holy Week long weekend. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) kept its policy rates steady once more. BSP Governor Benjamin Diokno assured the public by reiterating that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

**Fund Performance.** The Fund returned -0.29% for the month, above benchmark by 11 basis points.

**Fund Strategy.** The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid recovering oil prices and dwindling base effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
