INVESTMENT OBJECTIVE AND STRATEGY

The Fund is for US Dollar investors who want to achieve capital appreciation and income growth over a period of time. To achieve this, the Fund will be invested in a diversified portfolio of US dollar-denominated fixed income instruments issued by the Philippine government, corporations, & financial institutions. The Fund aims to outperform its benchmark, the JP Morgan Chase Asia Total Return Philippines Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Philippine Dollar Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of US Dollar denominated Philippine sovereign and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines rose by 1.05% in April as Philippine dollar-denominated bond yields outpaced the small gain in US Treasuries.

Global risk assets rallied in April as small patches of recovery began to show following a broader vaccine roll-out. As of April, 44% and 51% of the US and UK populations, respectively, had already been inoculated. This allowed for the start of a sustained reopening in their economies. Meanwhile, US President Joe Biden's first 100 days in office passed, a key takeaway being his willingness to spend. Biden has already outlined plans for two more spending packages following the US\$1.9 trillion stimulus package passed last March. This, along with improving US data releases— unemployment rate dropping to 0.6%, while jobs growth accelerated – paved the way for optimism that US economic recovery was well underway. Emerging markets painted a less rosy picture however, as coronavirus (COVID19) cases in India tragically worsened in April. This highlighted the urgency for a more even distribution of vaccines in less developed nations to prevent an even grimmer scenario moving forward. For the month, the 10-year US Treasury benchmark yield fell 11 basis points to close at the 1.63% level.

In the local economic space, March inflation eased to 4.5% year-on-year, slightly lower than February's 4.7% figure and putting an end to the 5-month streak of monthly price accelerations. The slowdown was mainly attributed to food and non-alcoholic beverage prices, though the Philippine Statistics Authority noted more tempered increases across all other price categories as well. Bangko Sentral ng Pilipinas (BSP) Governor Benjamin Diokno noted that the current level of inflation was still "consistent with expectations", adding that "inflation could settle above the high end of the target in 2021, reflecting the impact of supply-side constraints". Meanwhile, local coronavirus (COVID) infections continued to surge to new highs – peaking at 10,686 new cases in a day-- which prompted President Duterte to further extend various iterations of Community Quarantine across the country. With uncertainty regarding growth and inflation likely to persist, the Bangko Sentral ng Pilipinas (BSP) maintains that its current monetary policy is still appropriate. Governor Diokno reiterated that they were ready to address rising inflation pressures should any spillover effect begin to manifest.

Fund Performance. The Fund lost 0.82% for the month, behind its benchmark by 23 basis points. Year-to-date, it underperformed the benchmark by 19 basis points with a return of -1.76%.

Fund Strategy. The Fund looks to maintain a neutral duration position and opportunistically add exposure to corporate issuers to enhance yield. Global events remain likely to add volatility. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
