KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk:	The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) stumbled by 1.1% to 6,370.87 over the worsening situation of the pandemic. The country grappled with record-daily highs of new infections that battered the overall healthcare system. The government in turn, responded by renewing tight lockdowns to control the spread of infections. However, a ray of light seemed to pierce through the seemingly dark tunnel over the on-going vaccination program, though at a much slower pace due to delayed deliveries of the vaccines.

Volume was down for another month, with average daily turnover was 43.6% lower month-on-month at US\$115 million. In terms of foreign activity, net selling was yet again the main story, registering at US\$171 in April.

Macro-economic news for the month are as follows: 1) CPI rose at 4.5% in March, lower than the 4.7% increase in February. The ease was mainly due to lower inflation on food, particularly fish, fruits and vegetables. Utilities prices also moderated but was countered by increased transportation cost due to higher fuel prices. 2) Remittances from OFWs rose by 5% to US\$2.47bn in February. 3) The country's budget deficit widened to Php191 billion in March with Revenues dipping 17% year-on-year due to base effects from last year's dividend remittances to fund Bayanihan 1. Moreover, expenditure inched 22% higher year-on-year mainly due to infrastructure disbursements.

In terms of individual stock performances, main advancers were: MPI (+8.3%), ICT (+7.4%) and TEL (+4.5%); while the main laggards were: MEG (-12%), JGS (-11.7%) and RLC (-8.39%).

Fund Performance. The fund returned -1.17% in April, underperforming its benchmark by 5 basis points. Year-to-date, it outperformed the benchmark by 25 basis points with a return of -10.52%.

Fund Strategy. We look to remain strategic long-term buyers of Philippine equities, in hopes of a successful vaccine rollout. However, we will adopt a defensive stance tactically amidst the rising volatility from the negative fundamental newsflows and indexes rebalancing. Will continue to be nimble and buy on market dips
