KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

| | |
|----------------------------|--|
| Equity Price Risk: | The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions. |
| Liquidity Risk: | Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors. |
| Related Party Risk: | Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties. |

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange rose for another month following a continued improvement in the overall environment in this stage of the pandemic. A confluence of catalysts, namely – continuous drop in the number of COVID-19 cases, rise in the vaccination rates, better-than-expected economic growth and looser restrictions – led to the positive market sentiment. The local bell-weather index even surged to 5.5% to the 7,400 level intra-month before the threat of a newly-detected “Omicron” variant pared some of the gains. The PSEi grew by 2.1% month-on-month to close at 7,200.88 in November.

Market activity was a tad lighter for the month with average value turnover at US\$201.87 million or lower by 0.3% month-on-month. In terms of foreign activity, foreigners were net buyers for the 2nd consecutive month with US\$5.03 million that came in. The follow-on offering of Synergy Grid or “SGP” buoyed inflows after registering US\$24.2 million. MSCI rebalancing also occurred at month-end which highlighted the inclusion of AC Energy and Monde Nissin. Overall, the MSCI led to a net US\$13 million worth of inflow. Foreign participation registered at 49%, higher than 41% in October.

In terms of individual stock performance, main advancers were: BLOOM (+14.56%), SMPH (+12.99%) and ICT (+9.94%) while the laggards are as follows: ACEN (-7.99%), AP (-6.84%) and JGS (-6.06%).

Fund Performance. The fund returned 2.13% in November outperforming the benchmark by 6 bps. Year-to-date, it underperformed the benchmark by 9 basis points with a return of 0.77%.

Fund Strategy. We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclicals. We will continue to be nimble and take advantage on tactical opportunities.
