KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk:	The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, expositing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

Market Review. The Philippine Stock Exchange Index climbed yet again on improved market sentiment as optimism in the country's re-opening shifts to another gear. The country is experiencing continuous drop in the number of COVID-19 cases and thus translating to further easing of restrictions which helps boost the economy. The local bell-weather index rose by 1.46% to close at 7,054.70.

The market was more active in October after registering an Average Value Turnover of US\$202.53 or 15.7% higher than September. One of the main proponents of this higher activity was the deletion of First Gen Corp (FGEN) shortly after its tender offer. This was replaced by Wilcon Depot, Inc. (WLCON).

In terms of foreign activity, we saw foreigners turned net buyers this month at US\$8.02 million. This was buoyed by Megaworld REIT IPO and a block transaction of Union Bank. Otherwise, it would be another foreign selling month.

In terms of individual stock performance, main advancers were: RRHI (+20.17%), JFC (+14.73%), and BLOOM (+14.48%) while laggards were CNVRG (-20.50%), ICT (-7.69%) and JGS (-7.38%).

Fund Performance. The fund returned 0.27% in October outperforming the benchmark by 27 bps. Year-to-date, it underperformed the benchmark by 13 basis points with a return of -1.32%.

Fund Strategy. We remain strategic long-term buyers of Philippine equities that favor quality names and with position on cyclicals. We will continue to be nimble and take advantage on tactical opportunities.
