**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. ## OUTLOOK AND STRATEGY

**Market Review.** The local bourse index tumbled to end 2021 following the sharp rise in the number of COVID-19 cases. A suspected new variant called “Omicron”, along with the traditional holiday gatherings propelled a new surge. The alarm bells sounded-off and the government swiftly responded by enforcing a stricter quarantine measure – Alert level 3 in the National Capital Region from January 3 to 15. The PSEi declined by 1.09% month-on-month, to close 2021 at 7,122.63. For the year, the Philippines slipped by 0.24%.

In terms of market activity, the month of December gained more traction with Average Daily Turnover rising by 15.4% to US\$232.89 million. For foreign activity, foreigners continued to be net buyers with US\$1.72 Bn worth of inflows. Foreign participation was at 45%, lower than 49% recorded in November.

For this month's individual stock performance, the main advancers are as follows: MBT (+11.62%), AEV (+10.90%), and TEL (+7.86%) while the laggards were BLOOM (-19.13%), SMPH (-9.36%) and JFC (-7.90%).

**Fund Performance.** The Fund registered a loss of 1.09% in December. Meanwhile, the YTD performance of the Fund reported a loss of 2.06%, underperforming its benchmark by 182 bps.

**Fund Strategy.** We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclical. We will continue to be nimble and take advantage of tactical opportunities.
