KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) was off to a roller-coaster start, climbing high as high as 7,400 intra-day towards mid-month before plummeting at the end to close at 6,612.62 or -7.40% month on month. Early optimism over the COVID-19 vaccines that spurred the market has dissipated on expectations that the actual execution will be delayed. This entails that the economic recovery will also be pushed back. Volumes rose on a month-on-month basis, with the average daily turnover registering at US\$230 million. This is owing to the spike in local retail activity seen in small cap stocks. Foreign outflows continued, recording at US\$273 million to begin the year.

Macro-economic news for the month include: 1) 4Q2020 GDP fell by 8.3% (behind consensus of 7.9%) owing to weak domestic demand, and capital formation. 2) Inflation rose to 3.5% in December, within the BSP's 2.9% to 3.7% range. The increase was a result of higher food prices (vegetables, fruits and meats) due to supply constraints from typhoons. 3) The country's gross international reserves (GIR) climbed to US\$109.8 billion in end-December or equivalent to 11.7 months' worth of imports.

In terms of stock performance, the main advancers are as follows: FGEN (+5.86%), and LTG (+1.2%), while the biggest detractors were AEV (-15.77%), JGS (-15.08%) and PGOLD (12.20%).

Fund Performance. The Fund registered a loss of 7.88% in January, underperforming its benchmark by 50 bps.

Fund Strategy. We look to stay invested in domestic equities given the low global interest rates. We will continue buying on dips and adhere to large cap quality cyclical.
