KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Bell-weather index fell by 5.2% in March to 6,443.09 following the recent and more aggressive COVID-19 surge. The country has registered record-breaking daily new cases spurred by different variants of the disease. As a response, the government opted to shift back to the strictest quarantine measure – ECQ.

Volume was significantly lighter this month, with Average Daily Turnover recording US\$204 million or 19.7% lower month-on-month. Meanwhile, in terms of foreign activity, outflows persisted in March at US\$483 million. On a year-to-date basis, net foreign outflows registered at US\$946 million.

Macro-economic news for the month include: 1) Inflation increased to 4.7% in February, the highest in over two years. However, the BSP maintained policy rates at 2.0%. 2) The country's gross international reserves rose to US\$109.82 billion as of end-February on the back of BSP's foreign exchange operations and income from its investments abroad. 3) The National Government recorded a Php14.1 billion budget deficit for January of this year, a contrast of last year's Php23 billion surplus. This was partly a result of 12% YoY revenue contraction.

In terms of individual stock performance, the main advancers were SCC (+6.43%), PGOLD (+6.22%) and URC (+4.15%). Meanwhile, the biggest detractors include AEV (-18.15%), BLOOM (-13.00%) and MBT (-12.43%).

Fund Performance. The Fund registered a loss of 4.16% in March, outperforming its benchmark by 102 bps. Meanwhile, the YTD performance of the Fund reported a loss of 9.76%.

Fund Strategy. We look to remain strategic long-term buyers of Philippine equities, in hopes of improved vaccine rollout. However, we will adopt a defensive stance amidst the rising volatility from the negative fundamental views. Buy on market dips.
