## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -0.41% in April, with benchmark government yields rising 17 basis points (bps) on average. Average daily trading volume rose to PHP14.92bn from March's PHP13.83bn with trades mostly seen on the short-end (6-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions and four Treasury Bill auctions in April. Three out of the four FXTN auctions (3-, 5- and 10-year) were only partially awarded as investors continued to bid at higher levels in anticipation of rising global yields. Only the 7-year auction, a re-issuance of FXTN7-65 was fully awarded, with average yield at 5.779%, roughly 17 basis points higher than the prior month's reissuance of the same paper. The May auction schedule was released with four FXTN issuances (3-, 5-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

March headline inflation rose to a 6-month high of 4.0% year-on-year, as food, utilities and transportation costs rose in line with global fuel prices as the Russian-Ukraine tensions persisted. The figure was at the higher end of the Bangko Central ng Pilipinas' (BSP) target range of 2-4% for the year. The central bank had earlier warned that with fuel costs rising as a consequence of geopolitical tensions, Philippine inflation could breach the target before the end of the second quarter. The BSP shall continue to monitor emerging risks to the outlook for inflation and growth, and adjust policy settings as needed.

**Fund Performance.** The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned -0.56% for the month, closely tracking the benchmark index.

**Fund Strategy.** The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.
