KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange just experienced its largest monthly drop thus far in 2022 on a confluence of external and internal factors. Ongoing geopolitical tensions between Russia and Ukraine, US Federal Reserve well-anticipated rate-hike, rising commodity prices and China's lockdown to curb the rising COVID-19 cases, forced market investors to pull out on risky assets and stay on the sidelines. On the domestic front, the BSP hinted at raising policy rates if GDP grows around 6-7%. Moreover, all eyes on the 2022 national elections as new leaders will take the helm for the next 6 years. The local bell-weather index gave up 6.6% month-on-month to close at 6,731.25 in April.

We saw lackluster activity as Average Daily Turnover registered at US\$102.61 million in April or 37.4% lower in the prior month. On foreign flows, we saw another round of Net Outflows at US\$99 million. These were across the board which could have recorded at US\$154.8 if not for the AREIT overnight secondary share placement at US\$55.8 million inflows. Year-to-date, Net Foreign Outflows expanded to US\$219 million.

As for the individual stock performances, top contributors in April were EMP (+39.1%), WLCON (+3.7%) and TEL (+0.86%) while the laggards include ACEN (-17.30%), URC (-15.29%) and AEV (-14.96%).

The BPI Government Bond Index returned -0.41% in April, with benchmark government yields rising 17 basis points (bps) on average. Average daily trading volume rose to PHP14.92bn from March's PHP13.83bn with trades mostly seen on the short-end (6-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions and four Treasury Bill auctions in April. Three out of the four FXTN auctions (3-, 5- and 10-year) were only partially awarded as investors continued to bid at higher levels in anticipation of rising global yields. Only the 7-year auction, a re-issuance of FXTN7-65 was fully awarded, with average yield at 5.779%, roughly 17 basis points higher than the prior month's reissuance of the same paper. The May auction schedule was released with four FXTN issuances (3-, 5-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

March headline inflation rose to a 6-month high of 4.0% year-on-year, as food, utilities and transportation costs rose in line with global fuel prices as the Russian-Ukraine tensions persisted. The figure was at the higher end of the Bangko Sentral ng Pilipinas' (BSP) target range of 2-4% for the year. The central bank had earlier warned that with fuel costs rising as a consequence of geopolitical tensions, Philippine inflation could breach the target before the end of the second quarter. The BSP shall continue to monitor emerging risks to the outlook for inflation and growth, and adjust policy settings as needed.

Fund Performance. The fund returned -3.63% in April, underperforming its benchmark by 39 basis points. Year-to-date, it outperformed the benchmark by 66 basis points with a return of -2.36%.

Fund Strategy. We will stay on the sidelines pending a domestic rate hike, elevated global commodity prices and other financial shocks from Europe. Moreover, we continue to be nimble and ready for any tactical opportunities.

For the fixed income portion of the fund, the Fund looks to gradually increase its duration position following its recent shift in benchmark from the 91-day T-Bill to the BPI Philippine Government 1-5 Year Index effective February 1, 2022. The Fund will take advantage of the ongoing 5-year Retail Treasury Bond issuance to add exposure to the 3- to 5-year tenor bucket, while continuing to maintain a portion of the portfolio in corporate bonds for yield pick-up. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS
