KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

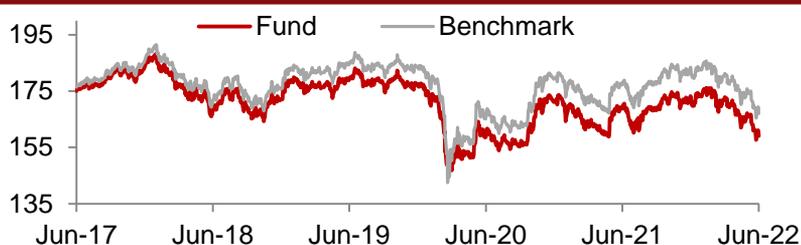

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The Philippines dropped sharply in June amidst global market weakness. Investors maintained their risk-averse stance on growing recession fears following the result of the US inflation print in May at 8.6%, a 40-year high. The US Federal Reserve consequently raised policy rates by 75 basis points. On the local economic front, the Bangko Sentral ng Pilipinas (BSP) likewise hiked its benchmark interest rates by 25 basis points to 2.50%. The local currency continued to depreciate during the period as it breached the Php55 mark versus the greenback. The Philippine Stock Exchange Index (PSEi) closed at 6,155.43 or -9.14% Month-on-month. For the first half of 2022, the bell-weather index lost 13.6%.

Activity was mostly lackluster in June with the exception on the FTSE rebalancing occurred in month-end. Average Daily Turnover recorded at US\$108 million or 42.2% lower month-on-month. Meanwhile, foreign flows continued to be net selling in June at US\$207 million. This has stretched the year-to-date Net Foreign Outflows to US\$774 million.

In terms of individual stock performances, top contributors for the month include: ACEN (+12.45%), EMP (+6.61%) and SMC (+6.31%) while the laggards were MEG (-21.74%), CNVRG (-20.19%) and AGI (-17.76%).

The BPI Government Bond Index returned -1.51% in June, with benchmark government yields rising 24 basis points (bps) on average. Average daily trading volume fell to PHP8.35bn from May's PHP10.89bn with trades mostly seen on the short-end (3-month to 3-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions and four Treasury Bill auctions in June. The re-issuance of the 3-year FXTN 3-27, 5-year FXTN 7-62, and 7-year FXTN 7-67 were partially awarded at average rates of 4.994%, 5.514% and 6.74%, while the second 7-year FXTN 7-67 auction was fully rejected. The new issuance of the 10-year paper, FXTN 10-68, was partially awarded with a coupon rate of 7.25%. The July auction schedule was released with four FXTN issuances (4-, 7-, 10-, and 14-year tenors) and four Treasury Bill auctions.

In the local economic space, May inflation rose to 5.4% year-on-year from 4.9% in April, well-above central bank's 2-4% inflation target. Higher prices were primarily driven by steep global oil and food prices. The Bangko Sentral ng Pilipinas (BSP) raised its policy rates to 2.5% from 2.25% to rein in continued price pressures driven by war in Europe and supply chain disruptions. Moreover, the BSP revised its inflation forecast upward for 2022 and 2023 to 5% and 4.2%, respectively.

Fund Performance. The fund returned -4.64% in June, outperforming its benchmark by 6 basis points. Year-to-date, it outperformed the benchmark by 85 basis points with a return of -6.78%.

Fund Strategy. The Fund will remain defensive given the persistent volatility propelled by higher inflation print, yields and accelerated global tightening. The fund will look to trim on names that have already priced-in the recovery story and accumulate on price weakness in select sectors.

For the fixed income portion of the fund, the Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
