KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) surged in November tracking global markets rally. Investors cheered on a slower US Inflation print and signal from the US Federal Reserve of a slower pace in its rate hikes. On the domestic space, key forces that helped lift risk appetite are as follows: (1) a strengthening Philippine Peso which closed at Php56.80/US\$; (2) upbeat 3Q2022 corporate earnings results where PSEi earnings growth went up by 42% YoY vs 40% YoY in 2Q2022 and; (3) strong 3Q GDP which came out higher-than-expected at 7.6%. The PSEi jumped by 10.2% to close at 6,780.78.

Trading volume remained lackluster for the month with the exception on the MSCI Rebalancing towards the close. Average Daily Value Turnover recorded at US\$117.50 million or 24.2% lower month-on-month. Meanwhile, foreigners became net buyers for the month, a feat that had not occurred since February. Net Foreign Buying registered at US\$99.4 million with foreign participation at 50%.

For the individual stock performances, the top index gainers for the month include: CNVRG (+25.49%), ALI (+23.53%) and ICT (+18.50%). Meanwhile, the bottom index performers are as follows: MER (-7.10%), MPI (-5.46%) and SCC (-3.72%).

The BPI Government Bond Index returned 0.87% in November, with benchmark government yields falling 5 basis points (bps) on average. Average daily trading volume rose to PHP11.35 billion from October's PHP7.04 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in November. The new issuance of the 3-year FXTN 3-28 was rejected, while the reissuance of the 5-year FXTN 20-14 and the 12-year FXTN 25-6 were partially awarded at average yields of 7.131% and 8.168%, respectively. The first 20-year paper (FXTN 20-25) issued this year was priced at 8.125% coupon, and was met with strong demand, spurred by market appetite for duration. Towards the end of the month, the BTr released the December auction schedule with two Treasury Bill auctions and three FXTN issuances (5-, 12-, and 20-year tenors).

In the local economic space, the 3Q GDP expanded faster than expected at 7.6% YoY, mainly driven by strong consumption growth as overall mobility increased and revenge travel spending soared despite the higher cost of living. The local inflation for the month of October rose by 7.7% year-on-year, its highest level in 14 years. Prices for food and fuel remained elevated amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 75 basis points during their policy meeting held mid-month. Central bank officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

Fund Performance. The fund returned 5.25% in November. Year-to-date, it outperformed the benchmark by 22 basis points with a return of -2.98%.

Fund Strategy. The Fund will maintain its defensive stance until volatility in the global markets subsides. Risk factors such as elevated interest rate and inflation, global recession fears, geopolitical risks coupled with low-volume trading will continue to put pressure on equity assets. However, we will take advantage of excessive market corrections to rebalance on quality names.

For the fixed income portion of the fund, the Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
