## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -1.93% in February, with benchmark government yields rising 50 basis points (bps) on average. Average daily trading volume fell to 14.01bn from January's PHP17.17bn with trades mostly seen on the short-end (1 month to 3-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held two FXTN auctions (4- and 10-year tenors) and four Treasury Bill auctions in February. Average rates of the fully awarded 4-year and 10-year FXTN auctions were 4.09% and 5.09%. The BTr also announced a 5-year Retail Treasury Bond (RTB) issuance, cancelling the two remaining FXTN auctions for the month. The 5-year paper was awarded at a coupon of 4.875% with a total size of 457.7 billion. The March auction schedule was released with five FXTN issuances (3-, 4-, 10- and two 7-year tenors) and four Treasury Bill auctions.

In the local economic space, the Philippines Statistics Authority (PSA) began adopting 2018 prices as the base year for inflation figures starting 2022. As a result, January inflation further eased to 3.0% year-on-year, primarily driven by slower food inflation and cheaper utility costs. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate at its record 2% low during their February meeting while raised its inflation forecast for 2022 to 3.7% from 3.4%. With the slowdown of daily cases rose and positivity rate, Metro Manila and other cities reverted back to Alert Level 2 lockdown for February.

The Philippine Stock Exchange Index (PSEi) had quite a swing in the 2nd month of 2022. The local bell-weather index managed to reach the 7,500 level earlier in February as the country saw a recovery from the OMICRON variant surge in January. The government eased restrictions and shifted to the lowest classification or Alert level 1 effective March first. Geopolitical tensions took the spotlight as Russia shocked the world following its "special military operation" or invasion of its neighbor country – Ukraine. The earlier gains of the index were pared and it ended 0.7% lower on a month-on-month basis to 7,311.01.

The local equities market saw more activity, with average daily turnover registering at US\$188 million in February or 58.6% higher compared to January. Meanwhile, Foreigners were net buyers after recording a Net Inflow worth US\$141 million on re-opening optimism of the country amidst the improving COVID-19 cases. They were seen buying cyclicals particularly SMPH and ALI as these stocks yielded inflows of US\$55.4 million and US\$38.9 million, respectively.

In terms of performance, telecommunications sector was the biggest underperformer for the month. GLO (-17.43%) and CNVRG (-15.17%) were 2 of the 3 biggest laggards in the PSEi along with consumer stock, EMP (-18.65%). Meanwhile, the main advancers include: SMPH (+13.39%), MER (+9.85%) and SECB (+8.86%).

**Fund Performance.** The fund returned -0.23% in February, outperforming its benchmark by 29 bps. Year-to-date, it outperformed the benchmark by 21 basis points with a return of 0.48%.

**Fund Strategy.** The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
