OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.64% in March, with benchmark government yields rising 27 basis points (bps) on average. Average daily trading volume fell to PHP13.83bn from February's PHP14.01bn with trades mostly seen on the short-end (3-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions and four Treasury Bill auctions in March. The new issuance of 3-year and 7-year FXTN papers, were fully rejected by the BTr. On the other hand, the re-issuance of the 4-year FXTN 5-77 and 7-year FXTN 7-65 were partially awarded at average rates of 4.669% and 5.601%, while the 10-year FXTN 10-67 was fully awarded at an average rate of 6.092%. The April auction schedule was released with four FXTN issuances (3-, 4-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

February inflation figure stayed at 3.0% year-on-year, primarily driven by slower food inflation and upside pressures coming from utilities and transport. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate steady at 2% during their March meeting while raising its last month's forecast to 4.3% from 3.7% for full year 2022 inflation and 3.6% from 3.3% for 2023. BSP Governor Diokno said the central bank is keenly aware that inflation will likely remain elevated due to domestic and global supply side pressures. With daily new cases of Covid-19 slowing down, Metro Manila and other cities eased to Alert Level 1 lockdown for March allowing full capacity in establishments and public transportation.

The Philippine Stock Exchange Index (PSEi) tumbled to end quarter number 1 as global markets took blows from the Russia-Ukraine conflict. The index dropped sharply, overshooting the 7,000 mark in early March, on fears of soaring commodity and oil prices. When the index reached the oversold area, bargain-hunting ensued and it leapt to close at 7,203.47 in March.

In terms of activity, the month of March was less active with Average Daily Turnover registering at US\$164 million or 12.8% lower month-on-month. On the foreign activity side, foreigners continued to be sellers with outflows at US\$205 million and with significant participation level at 48%. This brought the year-to-date figure at a net outflow of US\$120 million. A notable selling pressure came from FTSE rebalancing which saw the deletion of SM Investments (SM).

As for the individual stock performances, the top contributors for the month were CNVRG (+16.15%), ICT (+6.74%), and RLC (+6.7%). Meanwhile, the laggards for the month include MONDE (-17.07%), ALI (-10.13%) and LTG (-8.06%).

Fund Performance. The fund returned -0.07% in March, outperforming its benchmark by 4 bps. Year-to-date, it outperformed the benchmark by 24 basis points with a return of 0.41%.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
