## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned -1.29% in October, with benchmark government yields rising 45 basis points (bps) on average. Average daily trading volume fell to PHP7.04 billion from September's PHP11.22 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in October. The new issuance of the 10-year FXTN 10-70 was fully awarded with a coupon rate of 7.500%, while the reissuance of the 13-year FXTN 25-7 was fully awarded at an average rate of 7.887%. However, the reissuance of the 3-year FXTN 7-61 and the 6-year FXTN 7-68 were both partially awarded at average yields of 5.746% and 7.000%, respectively. As market participants bid higher pricing in rate hike expectations, the BTr awarded some bids above the secondary market rates. Towards the end of the month, the BTr released the November auction schedule with four Treasury Bill auctions and four FXTN issuances (3-, 5-, 12-, and 20-year tenors), offering the first 20-year paper for the year.

In the local economic space, inflation for the month of September rose by 6.9% year-on-year, its highest level in four years. Prices for food, fuel, and utilities remained elevated as supply side pressures persisted. Given the persistent price pressures and the current pace of FED rate hikes, BSP Governor Felipe Medalla remained hawkish with a remark of a possibility of more than 100-bp hike in the last 2 policy meetings for the year.

The Philippine Stock Exchange Index (PSEi) rallied in October on bargain-hunting after a steep decline in September. The PSEi's positive performance also tracked US stocks rally given better-than-expected 3Q earnings report and the hope that the US Federal Reserve (Fed) will slow the pace of its tightening. Cooling US housing market and decelerating manufacturing growth are few of the economic data that the Fed will definitely take into consideration. The PSEi rose by 7.2% to close at 6,153.43

Trading volume remained thin as many expected with Average Daily Value Turnover coming in at US\$ 155 million or 32% lower than the prior month. Meanwhile, foreigners continued to be net sellers at US\$11.6 million for October. This has stretched the year-to-date Net Foreign Selling to US\$ 1.24 billion.

For the individual stock performances, the top index gainers for the month include: MER (+14.60%), GLO (+14.38%) and BDO (+14.17%). Meanwhile, the bottom index performers were: SCC (-10.38%), RLC (-9.95%) and WLCON (-8.14%).

**Fund Performance.** The fund returned 0.07% in October, outperforming its benchmark by 17 bps. Year-to-date, it outperformed the benchmark by 83 basis points with a return of -1.96 %.

**Fund Strategy.** The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
