## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index lost 2.44% in September, with benchmark government yields rising by 74.12 basis points (bps) on average. Average daily trading volume fell to PHP10.62 billion from August's PHP14.46 billion with trades mostly seen on the belly (5- to 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in September. Of the four, only two were awarded. The reissuance of the 10-year FXTN1069 and the 7-year FXTN767 were both fully awarded at average yields of 6.703% and 6.588%, respectively, while the reissuance of 3.5-year FXTN301 and the 16-year FXTN2023 were both rejected. Participation across all auctions was mostly healthy, though the BTr opted to reject bids that were deemed too high, especially as it had just concluded a substantial Retail Treasury Bond issuance earlier during the month. Towards the end of the month, the October auction schedule was released with four FXTN issuances (3-, 6-, 10-, and 13-year tenors) and four Treasury Bill auctions.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

The Philippines Stock Exchange Index (PSEi) dove deep to end the quarter on global market turbulence as the US Fed raised interest rates anew and pledged further rate hikes. The US Federal Reserve (The Fed) raised policy rates by 75 basis points to 3.25% to fight inflation. The Bangko Sentral ng Pilipinas (BSP) followed suit by delivering a 50-basis point hike in its key policy rates to 4.25%. Moreover, the weakness of the Philippine Peso further pulled market sentiment after depreciating by 4.25% to PHP58.65/US\$ at end-September. The PSEi closed September at 5,741.07 or 12.8% lower on a month-on-month basis.

Trading volume withered with Average Value Turnover registering only at US\$109 million – or 21% lower than the previous month. Meanwhile, foreign selling was recorded at US\$216 million. On a year-to-date basis, net foreign outflows ballooned to US\$1.224 billion.

In terms of individual stock performances, these are the top three performers for the month of September: WLCON (+6.68%), SMC (+2.51%) and AP (-1.60%). Meanwhile, the bottom three performers are as follows: (-26.18%) MONDE, AC Energy (-25.33%) and CNVRG (-24.71%).

**Fund Performance.** The fund returned -1.41% in September, outperforming its benchmark by 32 bps. Year-to-date, it outperformed the benchmark by 65 basis points with a return of -2.04 %.

**Fund Strategy.** The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
