OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) kicked off the year on a strong note, rising by 3.4% to 7,361.65 to end January. However, the road was not without any bumps as the world anticipated the US Federal Reserve Tapering and as the country grappled with the fast-spreading Omicron. The latest surge prompted the government to tighten restrictions to Alert Level 3 – with a more limited capacity. But with a large number of the population already vaccinated particularly in the National Capital Region, Omicron quickly peaked and recovery ensued. Towards the latter part of the month, the government decided to ease its restrictions back to Alert level 2 beginning 1st of February. Notable change was on international travel where incoming inbound travelers were permitted entry without requiring to undergo a facility-based quarantine. Moreover, the release of the 4Q21 GDP where it rose 7.7% was well-received by market players.

In terms of market activity, volume was thin as investors remained on the sidelines amidst the Omicron surge. Average Daily Turnover declined by 49.1% to US\$118.6 million. For foreign activity, foreigners were net sellers, registering an outflow of US\$56 million. January was a quiet month with foreign participation dipping to 35% from 45% in December 2021.

In terms of individual stock performance, the PSEi names were split almost equally with 15 gainers and 14 losers. The main advancers were: AP (+18.86%), JGS (+17.92%) and AEV (+15.70%). Meanwhile, the top laggards include: RRHI (-13.76%), ACEN (-13.27%) and SECB (-9.92%).

Fund Performance. The fund returned 3.40% in January, outperforming its benchmark by 4 basis points.

Fund Strategy. We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclical. We will continue to be nimble and take advantage of tactical opportunities.
