OUTLOOK AND STRATEGY

Market Review. The Philippines dropped sharply in June amidst global market weakness. Investors maintained their risk-averse stance on growing recession fears following the result of the US inflation print in May at 8.6%, a 40-year high. The US Federal Reserve consequently raised policy rates by 75 basis points. On the local economic front, the Bangko Sentral ng Pilipinas (BSP) likewise hiked its benchmark interest rates by 25 basis points to 2.50%. The local currency continued to depreciate during the period as it breached the Php55 mark versus the greenback. The Philippine Stock Exchange Index (PSEi) closed at 6,155.43 or -9.14% Month-on-month. For the first half of 2022, the bell-weather index lost 13.6%.

Activity was mostly lackluster in June with the exception on the FTSE rebalancing occurred in month-end. Average Daily Turnover recorded at US\$108 million or 42.2% lower month-on-month. Meanwhile, foreign flows continued to be net selling in June at US\$207 million. This has stretched the year-to-date Net Foreign Outflows to US\$774 million.

In terms of individual stock performances, top contributors for the month include: ACEN (+12.45%), EMP (+6.61%) and SMC (+6.31%) while the laggards were MEG (-21.74%), CNVRG (-20.19%) and AGI (-17.76%).

Fund Performance. The fund returned -9.43% in June, underperforming its benchmark by 29 basis points. Year-to-date, it outperformed the benchmark by 95 basis points with a return of -12.63%.

Fund Strategy. The Fund will remain defensive given the persistent volatility propelled by higher inflation print, yields and accelerated global tightening. The fund will look to trim on names that have already priced-in the recovery story and accumulate on price weakness in select sectors.
