OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) managed to eke out gains for the eventful month of May. While the market continued to move in line with external events, politics was in the spotlight in the domestic space as the National Elections took place last May 9. Ferdinand Marcos Jr. emerged victorious as the President-elect after garnering majority of the votes. Alongside him is his running mate and daughter of the outgoing President, Sara Duterte, who won the Vice Presidency. Market sentiment was dampened still largely due to global economic concerns, local inflationary worries, and liquidity events (i.e MONDE's float number increase, CNVRG secondary share placement and MSCI rebalancing). However, the market rebounded following the appointments of key economic cabinet members and the release of better-than-expected 1Q 2022 GDP results. The PSEi rose by 0.65% to close at 6,774.68.

We saw significant level of activity during the month of May with Average Daily Turnover registering at US\$187 million or 90.8% higher than in April. Meanwhile, foreigners continued to be net sellers with a Net Foreign Outflow of US\$350 million in May, stretching the Year-to-date figure to US\$569 million.

In terms of individual stock performances, top contributors for the month include: MONDE (+14.02%), MBT (+7.63%) and GLO (+6.96%) while the laggards were SECB (-10.39%), AGI (-9.48%) and EMP (-8.41%).

Fund Performance. The fund returned 0.89% in May, outperforming its benchmark by 24 basis points. Year-to-date, it outperformed the benchmark by 135 basis points with a return of -3.54%.

Fund Strategy. To stay defensive following an impending higher inflation print, higher yields and accelerated global tightening. Take profit on names that have priced-in the recovery story. Continue to be nimble and ready for any tactical opportunities.
